this is a basic life support handbook for healthcare providers

basic life support bls provider manual the content in this handbook is in compliance with the 2020 guidelines for cpr and ecc emergency cardiac care recently released by the american heart association therefore all the protocols illustrated in this book are based on up to date evidence these guidelines are updated every 5 years the bls provider manual is a complete guide and reference tool that covers all the information students need to know in order to successfully complete the bls course for easier learning multiple choice questions can be found at the end of each chapter the answers to these exercises are found at the very end of the book basic life support bls refers to a set of procedures that can be learned to prolong survival in life threatening situations until more professional help is available any individual can become certified in basic life support protocols these protocols are frequently updated based on the latest evidence available and every individual who undergoes bls certification may need to refresh their knowledge every two years medical professionals usually have a sound understanding of basic life support protocols even then it is essential for them to frequently undergo certifications to update their knowledge regarding the latest evidence based protocols this handbook is designed for both medical professionals and non healthcare individuals it aims to establish a sound understanding of the mechanisms underlying basic life support the intended audience is healthcare students and personnel who need to learn how to perform cpr and other basic cardiovascular life support skills in a wide variety of both clinical and prehospital settings go to the top right of the page and click add to cart

regardless of occupation BLS should be a known skillset for all. This content guide serves as an instruction manual designed to explain the necessary tools to provide effective BLS whether in or outside of a hospital setting. When equipped with the right tools, it is possible to perform high quality BLS and restore normal heart rhythm. The content in this guide favors terminology specific to personnel who routinely care for patients. However, non medical personnel can also benefit from reading this guide as cardiac arrests are not confined to hospital settings only. Some of the equipment discussed is not applicable for non medical personnel such as a bag valve mask.

issued with a detached quick reference card.

This book is a simplified manual for basic life support BLS.

has companion BLS basic life support provider manual.

Handbook for dental chair side assistants is a timely and comprehensive resource designed to educate the dental chair side assistant and dental nurses about dentistry. This unique practical handbook covers the basic sciences, emergencies, and clinical aspects of all dental specialties. The theoretical knowledge and background about dental anatomy, dental microbiology, oral pathology, dental materials, dental radiology, dental procedures, common drugs, problems, and dental instruments in dental practice is explained in simple and clear terms. The contents have been designed to give an optimum balance between clinical skills and theoretical foundation of the subject. The book is divided into 2 parts. Part 1 covers basic sciences and includes a guide to working in dental clinics. Part 2 includes a guide to medical emergencies and information for different dental specialty settings. Key features: lucid yet simple explanations for learners, covers basic and practical tips for dental assistants and nurses, provides information for all dental specialties, includes notes on advanced technology in dentistry, illustrative and easy to retain information with colorful clinical pictures, flowcharts, and tabular data, a comprehensive summary for every chapter. The book is useful reading material for undergraduate dental students and trainees.

The Save a Life Initiative has just released its newest course, Basic Life Support. This manual is based on the 2015-2020 Basic Life Support Guidelines published by the American Heart Association. The Basic Life Support BLS Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a basic life support certification or recertification course. It serves as the primary training material for BLS certification and recertification courses. Although it is primarily intended for professionals to use during their courses, the handbook was also created to serve as daily resource material for health care professionals. Information covered in the handbook includes basic life support instruction for adults and children, AED usage, airway obstruction, and rescue breathing techniques, and more specific algorithms for BLS and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible.
