in the half decade since publication of the first edition there have been significant  
changes in society brought about by the exploding rise of technology in everyday  
lives that also have an impact on our mental health the most important of these has  
been the shift in the way human interaction itself is conducted especially with  
electronic text based exchanges this expanded second edition is an extensive body  
of work it contains 39 chapters on different aspects of technological innovation in  
mental health care from 54 expert contributors from all over the globe appropriate  
for a subject that holds such promise for a worldwide clientele and that applies to  
professionals in every country the book is now presented in two clear sections the  
first addressing the technologies as they apply to being used within counseling and  
psychotherapy itself and the second section applying to training and supervision  
each chapter offers an introduction to the technology and discussion of its  
application to the therapeutic intervention being discussed in each case brought to  
life through vivid case material that shows its use in practice chapters also contain  
an examination of the ethical implications and cautions of the possibilities these  
technologies offer now and in the future while the question once was should  
technology be used in the delivery of mental health services the question now is how  
to best use technology with whom and when whether one has been a therapist for a  
long time is a student or is simply new to the field this text will serve as an important

and integral tool for better understanding the psychological struggles of one's clients and the impact that technology will have on one's practice. Psychiatrists, counselors, social workers, nurses, and in fact every professional in the field of mental health care can make use of the exciting opportunities technology presents.
