what have we learned after three decades of research into school effectiveness what are the messages for policy makers for schools for classroom teachers for parents and their children what can we say with confidence about how schools improve what do we want from our schools in the future and how can we achieve it this book sets out to answer these questions reviewing findings from seminal international work and from a major study conducted recently in scotland the improving school effectiveness project it builds up a fascinating picture of what effectiveness is how it can be measured and what it means for teachers parents and pupils it provides key quantitative data that shows just how schools can and do make a difference but that their effects tend to be more powerful at different stages in a child s school career and with differing effects for girls and boys and for different school subjects from in depth work with twenty four case study schools we are also given much rich qualitative evidence about for instance the links between attitudes and attainment within a school about the ethos of a school and its capacity for change about the significance of a school development plan in bringing about changes and about the role and impact of critical friends in pursuing improvement in schools improving school effectiveness is an important book for everyone who is interested in valuing the effectiveness of and securing improvement in schools for teachers heads inspectors policy makers and students and scholars of school effectiveness and improvement

school improvement is at the centre of educational reform and is perceived by many as

a key to social and economic advance it contributes to determining the personal fulfilment and career paths of individual students and consequently engages the interest of parents and community members it is an ever present commitment of teachers and managers in schools policy makers and politicians at international national and local levels devote much time and effort to their search for better schools school improvement has also attracted the attention of researchers and scholars in many countries they have been drawn from various disciplines and fields within the educational studies community including psychology sociology history evaluation and studies in curriculum and assessment there is now an established body of findings from studies conducted in many contexts this book brings together leading experts drawn from many countries and several continents reflecting diverse approaches to educational policy and practice evaluation and research variations between countries and between local communities within countries are highlighted the possibilities and difficulties inherent in transferring evidence from one educational system at a number of levels to another are clearly discussed what emerges from the cross national and cross cultural evidence are several significant threads currently under active investigation including school structure and management classroom organisation school leadership teacher training and staff development curriculum and assessment community involvement lifelong learning and special provision for students with special educational needs school improvement international perspectives is written for national educational policy makers teachers and student teachers governing bodies and parents from various levels of schooling and university researchers and scholars

this concise accessible book provides an overview for the busy teacher about the connections between school improvement and improving what goes on in the classroom the book illustrates how classroom improvement occurs

this is a book about educational fads why they arise and how we might learn to live with them those working in schools are subject to perpetual waves of novelty in the name of school improvement and yet in the long term very little actually changes big ideas come and go leaving only faint clues as to their existence the trouble is that the appealing stories that take hold will never solve the fundamental problems of modern schooling the school system is too complex too diverse and too uncertain to be fixed by any big idea before too long the next big thing replaces the last big thing the next big thing in school improvement brings together the unique perspectives of a policy analyst a headteacher and a classroom teacher to explain why it is that the school system often resists our attempts to improve it drawing on the recent history of english education policy a variety of disciplinary traditions and the emerging field of complexity science the authors present a new take on why the school system behaves in ways that defy our attempts to change it this is a book about finding a better way to improve our schools it

is not the next big thing but it does explain why there will inevitably be one and what to do when it arrives

school improvement is an increasingly complex field with developments in policy research practice and language making it difficult to get a complete picture leading authors david woods and tim brighthouse pull together the approaches characteristics and technical terms needed for busy school leaders teachers governors and parents to quickly get to grips with current approaches and best practice combining their extensive experience of school improvement in action they provide an authoritative and up to date overview of the field and easy access to the wide range of information ideas and practices on making schools the best they can be a comprehensive a z introduces the characteristics approaches and language of school improvement ranging from appreciative enquiry to zero tolerance quotations case studies and butterflies little ideas with big impact illustrate the entries and bring them to life through the experiences of real schools they include discussion of key debates and controversies to stimulate discussion and guided reading by topic to help with further research

an inservice program for enhancing school learning climate and achievement

with this book the authors aim to assist people inside and outside schools to bring about positive change by helping them to define the purposes behind change the processes needed to achieve change and the results which they should expect

the purpose of our book is to share with our readers some insights we have acquired over the years in our administrative experience implementing change and reforms two areas that are critical for any reform to succeed are the way communications and conflicts are handled we have included a chapter on interpersonal communications that describes five basic communication skills we have also included a chapter on conflict with provides a number of insights on how to handle conflicts and how to avoid conflicts successfully dealing with communications and conflict are essential for improving levels of openness and trust crucial for school culture and climate are low levels of openness and trust there is little agreement amongst faculty that they are open and trusting with each other this creates a guarded environment where energy is being spent in a protective mode motivation that should go towards improving instruction is diverted to make sure teachers stay out of trouble improving levels of openness and trust is a thread throughout the book as is the concept of servant leadership if administrators and teachers are perceived as servants as opposed to self serving an improvement in levels of openness and trust will result the authors describe a number of activities for principals so they can practice the servant leadership style that is essential in order to enhance a school s culture and climate one of the activities addresses bullying behavior

bullying behavior must be addressed if there is to be a positive school culture and climate

the disciplines of school effectiveness research and school improvement practice and research have been apart for too long this book is the first major attempt by leading writers and practitioners in these fields to bring the areas together in a coherent way existing knowledge about the characteristics of good schools is outlined together with the knowledge base about how to make schools good schools the book also makes an entirely original contribution to re thinking practice in school improvement that can revolutionise our thinking in the late 1990s and which can be of use to academics to policymakers and to the practitioners which much existing work has neglected

in today s educational landscape the integration of technology into school counseling has become a vital tool for enhancing student support and guidance with advancements in digital platforms school counselors can reach students effectively streamline administrative tasks and access valuable resources to address a wide range of academic social and emotional needs digital technology transforms school counseling practices offering resources that enhance the effectiveness and accessibility of school counseling programs further research into school counseling technology may improve outcomes for students and contribute to a more inclusive accessible and responsive educational counseling environment enhancing school counseling with technology and case studies explores the integration of technology in school counseling as well as the various digital tools and platforms that enhance the effectiveness of school counseling it presents detailed case studies that illustrate the successful implementation of these technologies in diverse school settings providing best practices for integrating technology into counseling curricula addressing ethical and legal considerations and preparing for future trends in tech enhanced counseling this book covers topics such as digital technology gamification and telehealth and is a useful resource for educators sociologists psychologists academicians computer scientists and researchers

as societies continue to set educational goals that are on current performance beyond the capacity of the system to deliver strategies for enhancing student learning through school and classroom intervention have become increasingly important yet as david hopkins argues in his book many of the educational initiatives recently developed under the umbrella of school improvement are inadequate or unhelpful simply blaming teachers and delegating financial responsibility he maintains has little positive impact on classroom practice this is the bleak context within which school improvement has to operate today school improvement for real offers a genuine alternative a strategy for educational change that focuses on student achievement by modifying classroom practice and adapting the management arrangements within the school to support

teaching and learning it outlines an approach to school improvement that has a medium term systemic orientation providing both principles and suggestions for better practice the author's experience in the field of school improvement ensures that the text is informed by a practical wisdom that is so often lacking from the more typical managerial texts on improvement and effectiveness

school improvement like motherhood has many advocates everyone is for it without having to campaign actively on its behalf and just as the 100 of people who have had mothers think they know how mothering could be done better so the nearly 100 of people who have been pupils in schools or have even taught in or managed them think they know how schools can be improved more precisely they are sure that schools ought to be improved the trouble is that they propose a staggering conflicting range of methods of improving the schools from back to the woodshed to teacher merit pay a stiffer curriculum a stronger tax base reorganization a more humane climate teacher proof innovations community involvement the list is nearly endless furthermore the issues are not merely technical but normative and political the term improvement is itself problematic one person's version of improvement is another's version of wastefulness or even of worsening the schools furthermore the versions that win out in any particular school are not improvement sometimes turns out to be merely a necessarily technically best code word for the directives that administrators have successfully put into place or for the agreements that teachers have lobbied into being how much do we really know about school improvement the available research literature is quite substantial but not as helpful as it might be

self renewing schools where students and staff are involved in ongoing inquiry has long since been an ideal in education the book draws upon research on successful and unsuccessful school improvement programmes to generate a practical strategy for school improvement that can be used by schools and local education authorities with a high probability of success

the pressure on schools to improve and to raise achievement continues to be a dominant issue in both school and government policies school effectiveness and school improvement seeks to develop the debate further providing academics and practitioners alike with a summary and discussion of research on school effectiveness and school improvement up to the present new perspectives on these fields developed from other traditions of thinking and research a consideration of the role of organization theory an integrated view of these current perspectives and clear practical implications for policy and practice

this book explores an approach to school improvement that merges the traditions of

educational effectiveness research and school improvement efforts it displays how the dynamic model which is theoretical and empirically validated can be used in both traditions each chapter integrates evidence from international and national studies showing how the knowledge base of educational effectiveness research can be used for improvement purposes in a clear and practicable manner it outlines foundations of the improvement approach research projects investigating the impact of the dynamic approach guidelines and practical solutions to translating the approach into action further developments for school improvement exploring the crucial factors in the establishment of this environment the authors outline a dynamic framework that helps schools collect data through self evaluation mechanisms taking decisions about priorities for improvement and developing appropriate policies and action plans this approach emphasises educational targets and provides means to achieve them that are flexible enough to fit in with the circumstances of the individual school the book draws upon research across the world conducted especially in the united states europe and australasia expertly showcasing how the dynamic approach can be used in a wide variety of educational settings a key book for all professionals working in education academics researchers policy makers school advisors and practitioners will find it invaluable not only it is a must for graduate students university libraries and individual academics but also for school management teams school support agencies and officials in educational policy

school improvement has become a dominant feature of educational reform in many countries the pressure upon schools to improve performance has resulted in a wide range of improvement programmes and initiatives which can provide both inspiration and advice to everyone involved in school improvement this book draws together the most effective school improvement projects from around the world in one comprehensive text including detailed comparative analysis of a wide variety of initiatives drawing on examples from the uk the usa canada south africa and australia this book gives both an international snapshot and a coherent synthesis of initiatives that have given achievable results
