this book explores the geography of religion and the space of the sacred in the dynamics of the different manifestations of contemporary christianity in the face of the growth of protestantism for this the analysis of the spirituality of opus dei is prioritized and the history of the emergence of the roman doctrine and its dissemination until the present day is detailed in order to understand the evolution of western civilization a sensitive approach to its religious spatiality is necessary this spatiality manifests itself concretely in its territory transforming the landscape of the place continuously over time with this in mind the book promotes a geographical discussion which identifies the possible causes of the decline of catholicism in brazil as well as analyzing the catholic church s loss of believers and territories

people dreamed of cosmic exploration winged spaceships and lunar voyages space stations and robot astronauts long before it actually happened space and the american imagination traces the emergence of space travel in the popular mind its expression in science fiction and its influence on national space programs space exploration

dramatically illustrates the power of imagination howard e mccurdy shows how that power inspired people to attempt what they once deemed impossible in a mere half century since the launch of the first earth orbiting satellite in 1957 humans achieved much of what they had once only read about in the fiction of jules verne and h g wells and the nonfiction of willy ley reaching these goals however required broad based support and mccurdy examines how advocates employed familiar metaphors to excite interest promising for example that space exploration would recreate the american frontier experience and prepare the public for daring missions into space when unexpected realities and harsh obstacles threatened their progress the space community intensified efforts to make their wildest dreams come true this lively and important work remains relevant given contemporary questions about future plans at nasa fully revised and updated since its original publication in 1997 space and the american imagination includes a reworked introduction and conclusion and new chapters on robotics and space commerce

a fascinating account of how the united states established the first global satellite communications system to project geopolitical leadership during the cold war on july 20 1969 the world watched spellbound as nasa astronaut neil armstrong stepped off the apollo 11 lunar module to walk on the moon nasa estimated that 20 percent of the planet s population nearly 650 million people watched the moon landing footage which was made possible by the first global satellite communications system the international telecommunications satellite organization or intelsat in beyond sputnik and the space race hugh r slotten analyzes the efforts of us officials especially during the kennedy administration to establish this satellite communication system and open it to all countries of the world locked in competition with the soviet union for both military superiority and international prestige president john f kennedy overturned the eisenhower administration s policy of treating satellite communications as simply an extension of traditionally regulated telecommunications instead of allowing private communications companies to set up separate systems that would likely primarily serve major developed regions the new administration decided to take the lead in establishing a single world system explaining how the east west cold war conflict became increasingly influenced by north south tensions during this period slotten highlights the growing importance of non aligned countries in asia latin america and africa he also underscores the importance of a political economy of total cold war in which many crucial aspects of us society became tied to imperatives of national security and geopolitical prestige drawing on detailed archival records to examine the full range of decisionmakers involved in the intelsat system beyond sputnik and the space race spotlights mid and lower level agency staff usually ignored by historians one of the few works to analyze the establishment of a major global infrastructure project this book provides an outstanding analytical overview of the history of global electronic communications from the mid nineteenth century to the present

what is space this fascinating journey of exploration begins in our own minds the space within our brains we discover how space is used in sign language and in architecture before moving on to the virtual space created in an imaginary computer generated world the delineation of space has been important throughout human history and we look at how boundaries have been mapped in the past and how they remain politically important today finally we travel into outer space to look at human exploration and the ultimate nature of space and the universe

star wars meets ridley pearson s kingdom keepers in this high stakes intergalactic adventure the moon platoon is the first book in an action packed series for tweens that s perfect for fans of eoin colfer and lisa mcmann in the year 2085 benny love is pretty used to surviving on what he and his family can scavenge on earth but when he wins a

scholarship for a life changing trip to visit the lunar taj the first ever resort on the moon benny thinks he finally has a chance to give his family a better life benny can t wait to fly his very own space runner practice reverse bungee jumping and explore craters on the dark side of the moon but he gets more than he expected when he and the other kids discover the moon has secrets no one else knows about benny is a long way from home and soon there might not be an earth to go back to

presents a series of 250 significant events in the history of astronomy and space exploration from the original formation of the galaxies to the space mission to the planet mars to speculation about the end of the universe

a meeting with the universe is the story of what we learned about the universe and ourselves by going into space it is not a textbook for scientists it is written for everyone who shared the excitement and wonder fo the last few years students teachers scientists other professional people and curious citizens of all kinds it is not a nasa history it is a history of space exploration by nasa by universities by other government agencies and by industries all of whom have played major roles we have not attempted to apportion credit here space has been studied by many and the discoveries belong to us all the book itself is a novel experiment in writing about science for non scientific readers it was not produced by science writers or journalists but written and edited entirely by a group of nasa scientists all of whom are deeply involved in space science activities and many of whom actively participated in the discoveries they describe we are now at a watershed in space after 20 years of challenging and exciting activity we have done most of the easy things and made most of the obvious discoveries what do we do next how do we tackle the many new questions that have arisen about the sun the earth the other worlds the universe around us and ourselves these are not just scientific questions their answers involve the understanding of the earth s geology its weather and its climate factors that will affect the survival of our civilization perhaps even of our species although we have only begun our movement into space we have already traveled far and seen much we have a shining vision of the universe and our future in it without that vision without the will to follow it something important in us perhaps we ourselves will perish from the preface dr john e naugle chief scientist nasa

includes the institute s proceedings
