in 2010 the then current european national standards for building and construction were replaced by the en eurocodes a set of pan

European model building codes developed by the European Committee for Standardization the Eurocodes are a series of 10 European standards EN 1990 to EN 1999 that provide a common approach for the design of buildings, other civil engineering works and construction products. The design standards embodied in these Eurocodes will be used for all European public works and are set to become the de facto standard for the private sector in Europe with probable adoption in many other countries. This classic manual on structural steelwork design was first published in 1955, since when it has sold many tens of thousands of copies worldwide. For the seventh edition of the Steel Designers' Manual, all chapters have been comprehensively reviewed, revised to ensure they reflect current approaches and best practice and brought in to compliance with EN 1993 Design of Steel Structures, the so-called Eurocode 3.

This classic manual on structural steel design provides a major source of reference for structural engineers and fabricators working with the leading construction material. Based fully on the concepts of limit state design, the manual has been revised to take account of the 2000 revisions to BS 5950. It also looks at new developments in structural steel, environmental issues and outlines the main requirements of the Eurocode on structural steel.

This book provides insight into the design, analysis and construction of a variety of building types.

Designed for engineers, architects and building construction professionals, this reference contains information on designing wood structures and wood components, from the basic engineering properties of wood to design equations and examples to practical construction guidelines. The book is full of ready-to-use information.

The Wood Framing Contractor's Bible takes all the answers to wood framing questions to your jobsites, featuring a compact format. Wood Framing Portable Handbook by registered building inspector Jonathan F. Hutchings is the perfect easy-to-carry-on-the-job tool. With it in hand, you'll avoid errors and code violations and benefit from time-saving tips and money-saving techniques. Quick access to charts, tables and equations provides reliable on-site guidance. Plus, you even have space to input your own notes and checklists. Packed with detailed illustrations, it contains everything builders need to know about balloon and platform framing, framing fasteners, structural diaphragms, joists, girders and purlins, frame-to-foundation connection adhesives, wind and earthquake loads, fire-resistant framing, load-bearing exterior walls, stud partition walls, prefabricated framing assemblies, grade marks, span ratings, glulams, curved panels, roof truss erection loads, bridging and bracing, connectors and holdowns, and hundreds more wood framing considerations.
