the rapidity with which knowledge changes makes much of past science obsolete

and often just wrong from the present's point of view we no longer think for example that heat is a material substance transferred from hot to cold bodies but is wrong science always or even usually bad science the essays in this volume argue by example that much of the past's rejected science wrong in retrospect though it may be and sometimes markedly so was nevertheless sound and exemplary of enduring standards that transcend the particularities of culture and locale

there was a time in this century when liberals championed the working class when democrats were indisputably the party of those who worked rather than invested for a living today however most americans have come to see liberals as drifting and aimless somehow lacking in backbone and moral fiber beholden to radical ideologies that have little to do with the average american's life few incidents cast this phenomenon into greater relief than george bush's successful tarring of michael dukakis as a liberal in 1988 and tellingly dukakis's subsequent flight from the liberal tradition how has it come to this why have liberals allowed themselves to be so portrayed in this book gordon macinnes state senator fiscal conservative frustrated democrat and a man who believes deeply in america's civic culture reveals how progressive forces have retreated from the battle of ideas at great cost squarely at the nexus of race poverty and politics wrong for all the right reasons charts the sources of liberal decline and the high costs of conservative rule tracing the origins of the liberal retreat to the fall out over senator daniel patrick moynihan's report on the black family in the 1960s macinnes claims that white liberals have somewhere along the way stopped taking black people seriously enough to argue with them continuously put on the defensive liberals have been unable to forge an aggressive proactive agenda of that addresses the needs of working class and poor americans this has led to a breakdown of honest dialogue which to this day continues to plague liberal democrats as evidenced by bill bradley's withdrawal from active party politics last fall finding room for optimism in the groundswell of grass roots progressivism wrong for all the right reasons is a timely necessary call to arms for liberal progressive democrats outlining ways in which they can reverse their party's dangerous decline

the striking extent of religious disagreement suggests that religious conviction is very often the result of processes that do not reliably produce true beliefs for this reason many have argued that the only rational response to religious disagreement is to adopt a religious skepticism that eschews confident religious belief disagreement deference and religious commitment contests this skeptical conclusion explaining how it could be rational to maintain confident belief even in the face of the epistemic worries posed by disagreement john pittard argues against the commitment to rigorous epistemic impartiality that underlies the case for disagreement motivated religious skepticism while also critiquing approaches to disagreement that allow for the unproblematic privileging of one s first person perspective he emphasizes the importance of having rational insight into reasons that favor one s outlook however he challenges narrowly intellectualist accounts of insight arguing that many of the rational insights crucial to assessing religious outlooks are not achievable through analytical reasoning but only through relevant emotional experiences in the second part of the book pittard considers the implications that accepting the impartiality requirement favored by disagreement skeptics has for religious commitment he challenges the common assumption that a commitment to rigorous epistemic impartiality would rule out confident religious belief he further argues however that such an impartiality commitment would likely make it irrational to pursue one s favored form of religious life and might prevent one from rationally engaging in any religious or irreligious way of life whatsoever this troubling conclusion gives reason to hope that the arguments against impartiality are correct and that one can justify conviction despite widespread disagreement
