formulation is a key step in the drug design process where the active drug is combined with other substances that maximise the therapeutic potential safety and stability of the final medicinal product modern formulation science deals with biologics as well as small molecules regulatory and quality demands in addition to advances in processing technologies result in growing challenges as well as possibilities for the field pharmaceutical formulation provides an up to date source of information for all who wish to understand the principles and practice of formulation in the drug industry the book provides an understanding of the links between formulation theory and the practicalities of processing in a commercial environment giving researchers the knowledge to produce effective pharmaceutical products that can be approved and manufactured the first chapters introduce readers to different dosage forms including oral liquid products topical products and solid dosage forms such as tablets and capsules subsequent chapters cover pharmaceutical coatings controlled release drug delivery and dosage forms designed specifically for paediatric and geriatric patients the final chapter provides an introduction to the vital role intellectual property plays in drug development covering modern processing methods and recent changes in the regulatory and quality demands of the industry pharmaceutical formulation is an essential up to date resource for students and researchers working in academia and in the pharmaceutical industry

a practical and thematic guide to european patent law updates for the third edition include insights on the fast moving subjects of fraud and plausibility along with coverage of every substantive decision of the upc

advances in heterocyclic chemistry volume 128 is the definitive series in the field one of great importance to organic chemists polymer chemists and many biological scientists because biology and organic chemistry increasingly intersect the associated nomenclature is being used more frequently in explanations written by established authorities in the field from around the world this updated volume includes sections on recent advances in 1,2,4-triazole 1,5-pyrimidine chemistry fluorescent heterocycles recent trends and new developments and reactions of 3-pyrroline 2-ones considered the definitive serial in the field of heterocyclic chemistry serves as the go to reference for organic chemists polymer chemists and many biological scientists provides the latest comprehensive reviews as written by established authorities in the field combines descriptive synthetic chemistry and mechanistic insight to enhance our understanding on how chemistry drives the preparation and useful properties of heterocyclic compounds

uncertain futures an assessment of the conditions of the present provides a detailed look into the economic and political conditions of our present moment from a marxist perspective key aspects of marxist economic theory are illustrated in clear ways in order to provide an easy introduction to marxist thought and their applicability the book also examines the sluggish recovery from the great recession in the context of the long term feasibility of sustaining the capitalist system by placing it into a historical framework it considers the necessity of social democratic reforms while calling for an anarchic re invigoration of the politics of everyday life

from the master and servant legislation to the factories acts of the 19th century the criminal law has always had a vital yet normatively complex role in the regulation of work relations even in its earliest forms it operated both as a tool to repress collective organizations and enforce labour discipline while policing the worst excesses of industrial capitalism recently governments have begun to rediscover criminal law as a regulatory tool in a diverse set of areas related to labour law

modern slavery penalizing irregular migrants licensing regimes for labour market intermediaries wage theft supporting the enforcement of general labour standards new forms of hybrid preventive orders harassment at work and industrial protest this volume explores the political and regulatory dimensions of the new criminality at work from a wide range of disciplinary perspectives including labour law immigration law and health and safety regulations the volume provides an overview of the regulatory terrain of criminality at work exploring whether these different regulatory interventions represent politically legitimate uses of the criminal law the book also examines whether these recent interventions constitute a new pattern of criminalization that operates in preventive mode and is based upon character and risk based forms of culpability the volume concludes by reflecting upon the general themes of criminality at work comparatively from Australian Canadian and US perspectives criminality at work is a timely rich and ambitious piece of scholarship that examines the many intersections between criminal law and work relations from a historical and contemporary vantage point

metalloenzymes from bench to bedside offers a thorough overview of metalloenzymes spanning biochemical and structural features pharmacology and biotechnological applications after a brief overview international experts in the field discuss a wide range of magnesium calcium zinc manganese nickel iron copper cadmium molybdenum and tungsten enzymes along with catalytic roles within their active sites with a uniform approach throughout each chapter includes the structure and function of the enzyme physiologic and pathologic roles inhibitors and activators of the enzyme and their design and clinical agents or compounds applied in medicine and drug discovery this book enables scientists across academia and industry to adopt ongoing metalloenzyme research and continuous discovery of novel metalloenzymes in new life science studies and clinical applications examines a range of metalloenzymes from biochemistry to pharmacology and drug design each chapter examines enzyme structure and function physiologic and pathologic roles inhibitors and activators and clinical application features chapter contributions from international experts in the field

the most useful properties of food i.e. the ones that are detected through look touch and taste are a manifestation of the food's structure studies about how this structure develops or can be manipulated during food production and processing are a vital part of research in food science this book provides the status of research on food structure and how it develops through the interplay between processing routes and formulation elements it covers food structure development across a range of food settings and consider how this alters in order to design food with specific functionalities and performance food structure has to be considered across a range of length scales and the book includes a section focusing on analytical and theoretical approaches that can be taken to analyse characterise food structure from the nano to the macro scale the book concludes by outlining the main challenges arising within the field and the opportunities that these create in terms of establishing or growing future research activities edited and written by world class contributors this book brings the literature up to date by detailing how the technology and applications have moved on over the past 10 years it serves as a reference for researchers in food science and chemistry food processing and food texture and structure
