a wide ranging history tracing the birth of biopolitics in enlightenment thought and its aftermath in enlightenment biopolitics historian william max nelson pursues the ambitious task of tracing the context in which biopolitical thought emerged and circulated he locates that context in the enlightenment when emancipatory ideals sat alongside the horrors of colonialism slavery and race based discrimination in fact these did not just coexist nelson argues they were actually mutually constitutive of enlightenment ideals in this book nelson focuses on

enlightenment era visions of eugenics including proposals to establish programs of selective breeding forms of penal slavery and spurious biological arguments about the supposed inferiority of particular groups the enlightenment he shows was rife with efforts to shape harness and organize the minds and especially the bodies of subjects and citizens in his reading of the birth of biopolitics and its transformations nelson examines the shocking conceptual and practical connections between inclusion and exclusion equality and inequality rights and race and the supposed improvement of the human species and practices of dehumanization
