one of the most difficult issues that confronts veterinarians and staff today concerns the profession's obligation to the animal and the sometimes conflicting demands from clients, peers, and society. The book offers a highly readable and approachable introduction to the nature of ethical theory, reasoning, and decision making and its practical application to veterinary medicine. Now with over 100 real-life veterinary case histories and analysis, this edition also includes new discussions of animal pain, distress, and happiness; ethics of critical care; alternative medicine; legal status and value of animals; and Aesculapian authority.
