i am very thankful to springer verlag for publishing a collection of some of my non mathematical works i call them political works in the broad sense of the word political three of these have appeared in print my article on the ladd lipset suivey which appeared in the new york review of books 18 may 1978 and also in the file springer verlag 1981 my article on the baltimore case which appeared in the jour nal of ethics and behavior february 1993 my articles on hiv and aids which appeared in the yale sci entific fall 1994 and winter 1995 reprinted updated in the book aids virus or drug induced kluwer academic pub lishers 1996 pp 271 307 the first item academia journalism and politics is itself a book based on my huntington file the background and motiva tion section of this sub book can be used as a foreword for all my political works and also contains an explanation of how i use the word political in that section readers will find a general discussion of the way i process information and some criteria i use in discourse

neil m maher examines the history of one of franklin d roosevelt s boldest and most successful experiments the civilian conservation corps describing it as a turning point both in national politics and in the emergence of modern environmentalism

explains the process behind science news an elite few scholarly journals control press coverage through a mechanism known as an embargo this work surveys 25 daily us newspapers and relates interviews with reporters to examine the inner workings of the embargo and how it structures our understanding of news about science

this refreshing account of wellbeing perspectives of ecuadorian good living sheds a new light on sustainability debates it puts into question the universality of the un sustainable development goals the slogan of the goals leave non one behind begs the question who is behind and who is ahead development is caught in the logic of linear sustainable growth of nations or centres around the flourishing of the individual instead of the community let mother earth lead summarizes the indigenous american approach embracing a biocentric outlook on life where human laws and environmental governance systems must follow the laws of the earth with concrete examples of policies law jurisprudence and practice from ecuador this book is a must read for philosophers willing to think beyond european philosophy development economists interested in reshaping today s paradigms innovative lawyers with an environmental heart anthropologists who yearn for a dialogue between worldviews of the global south and science and all people who seek new meaning in today s society

this book considers de marginalization attesting that marginal regions have the potential for de marginalization and are anchored in developmental terms on the following core themes nature tourism ethnicity and general factors including migration adding to the discussion on marginality and sustainability this book contributes a number of case studies on a diverse selection of topics and regions in which these crucial issues connect it delivers a reflection of de marginalizing processes in today s globalized world where an increasing number of people groups societies and regions are marginalized and vulnerable not only from social and economic factors but also from natural causes such as natural hazards this book addresses the unsustainable practices in the past that have often generated difficult conditions for sustainable development in the future marginal regions that have not been developed are given much needed consideration as they may now enjoy the benefits of having not been exploited in the past to their present day developmental advantage the overview offered by this book is significant in that marginal regions with relatively unspoiled and attractive natural and cultural landscapes have a great potential for sustainable tourism contributions include the de marginalization of ethnic groups the role of education and migration in the process and different economic and political perspectives considering the topics covered the book should be appreciated by

all those involved in creation of social policies urban and regional planning coordinating economic with spatial and social development and by those studying in the fields were competencies for such activities are important part of the study program

animal cloning has developed quickly since the birth of dolly the sheep yet many of the first questions to be raised still need to be answered what do dolly and her fellow mouse cow pig goat and monkey clones mean for science and for society why do so many people respond so fearfully to cloning what are the ethical issues raised by cloning animals and in the future humans how are the makers of public policy coping with the stunning fact that an entire animal can be reconstructed from a single adult cell and that humans might well be next the cloning source book addresses all of these questions in a way that is unique in the cloning literature by grounding what is effectively an interdisciplinary conversation in solid science in the first section of the book the key scientists responsible for the early and crucial developments in cloning speak to us directly and other scientists evaluate and comment on these developments the second section explores the context of cloning and includes sociological mythological and historical perspectives on science ethics and policy the authors also examine the media's treatment of the dolly story and its aftermath both in the united states and in britain the third section on ethics contains a broad range of papers written by some of the major commentators in the field the fourth section addresses legal and policy issues it features individual and collective contributions by those who have actually shaped public policy on reproductive cloning therapeutic cloning and similarly contentious bioethical issues in the united states britain and the european union animal cloning continues for agricultural and medicinal purposes the latter in combination with transgenics human cloning for therapeutic purposes has recently been made legal in britain the goal is to produce an early embryo and then derive stem cells that are immunologically matched to the donor two human reproductive cloning projects have been announced and there are almost certainly others about which we know nothing sooner or later a cloned human will be born many lessons can be learned from the cloning experience most importantly there needs to be a public conversation about the permissible uses of new and morally murky technologies scientists journalists ethicists and policy makers all have roles to play but cutting edge science is everybody's business the cloning sourcebook provides the tools required for us to participate in shaping our own futures
