a high profile thought experiment asks leading scholars to make cases for spending additional aid money to combat major world problems

in this book leading economists evaluate how the world can best spend money to combat the world's biggest problems

perspectives on afghanistan's trade and development offers a rich and varied policy analysis for those who wish to design a policy to bolster exports from afghanistan and for academicians researchers and students who wish to gain greater insight into this developing economy

arranged in six sections each section examines a different aspect of international trade and other related issues topics such as world economy exchange rates and dollar fluctuations are discussed by international scholars

in this paper we show that inequality is an important determinant of import demand in that it augments the standard gravity model in a significant way we interpret this result with the aid of a model in which tastes are nonhomothetic classification of products based on the

correlation between household budget shares in the us and income into luxuries and necessities works very well in our analysis when we restrict the analysis to developed importing countries while the imports of luxuries increase with the importing country s inequality imports of necessities decrease with it furthermore we find that an increase in the level of inequality in the importing country generally leads to an increase in imports from developed countries and to a reduction in imports from low income countries nber website

this paper provides new perspective on the poor performance of exchange rate models by focusing on the information structure of fx trading i present a new theoretical model of fx trading that emphasizes the role of incomplete and heterogeneous information the model shows how an equilibrium distribution of fx transaction prices and orders can arise at each point in time from the optimal trading decisions of dealers this result motivates an empirical investigation of how the equilibrium distribution of fx prices behaves using a new data set that details trading activity in the fx market this analysis produces two striking results i much of the observed short term volatility in exchange rates comes from sampling the heterogeneous trading decisions of dealers in an equilibrium distribution that under normal market conditions changes comparatively slowly ii in contrast to the assumptions of traditional macro models public news is rarely the predominant source of exchange rate movements over any horizon

do countries benefit from their membership in the wto this book addresses this question and examines the role of the wto in the process of economic development of emerging markets and other developing countries

these and other questions are at the forefront of international and national discussions and are closely linked to the broader debate about global governance and effective development policy this report focuses on two main themes the reform of the international financial architecture as a response to global financial crises and how to finance and promote development as a means of reducing global inequality it reviews the major proposals brought forward to address these challenges by academics policy makers and non governmental groups in doing so it provides a basis for informed policy discussion at both the european and global level the starting point is an analysis of current globalisation trends its driving forces benefits and challenges editor
