only reliable under the assumption that unrealistic background conditions are fulfilled finally it provides the groundwork for a systematic ethics of argumentation it does so by showing how a function of argumentation can be justified via moral reasons and by providing the outlines for both an applied ethics of meta level normative argument design and an applied role ethics of object level arguing the ethics of argumentation is essential reading for researchers and graduate students in a wide range of disciplines including philosophy communication studies linguistics and rhetoric who are interested in communication deliberation argumentation critical thinking and social epistemology
