before the rise of republics relations between communities were religious and military power based  
on the rights of the gods and spiritual warfare the sublime powers granted to the elect of the deities  
with the appearance of the republics and the free man international relations as we know them today  
began the interaction between the national states with equal culture or legal society independence  
and sovereignty the right to war disappears no republic establishes the law of war to destroy another  
nation the world of nations originated and consolidated in the american continent during the  
seventeenth and eighteenth centuries for the other continents the process began in europe s first  
world war and extended to asia and africa during the second world war and the cold war but even  
today religious empires defend themselves by creating wars within republics and supported by  
monarchies and spiritual states freedom of worship is established in the republics to end servitude  
no more servants of religion who persecute condemn and subjugate peoples in the name of the gods  
faith ceases to be an obligation and becomes an option in the republic you can be an atheist during  
work hours a worshipper of venus at lunch a priest of bacchus and morpheus at night and a  
worshipper of hu tzil p chtli during a sporting event and no civil authority can judge you for  
changing religion or prioritizing science over mythologies in contrast to natural rights republics  
establish citizen and social rights with constitutions nature does not grant any rights the creation of  
the free man in the american continent gave good results that inspired european intelligence to  
create great cosmogonies such as marxism and liberalism but religious empires remain a factor of  
control and domination they have no legal personality do not pay taxes have their own rules and  
demand tribute from their faithful
