a complete guide to the design and implementation of successful neurocontrol applications neurocontrol towards an industrial control methodology is the first and

only volume that presents a unified framework for neural network based techniques it demystifies neurocontroller design and promotes the broad application of neurocontrol to nonlinear control problems divided into two major parts the theoretical and the practical this book links neurocontrol with the concepts of classical control theory describes the steps necessary to implement a working algorithm and provides the information necessary to develop competitive applications of industrial size and complexity throughout the focus is on the most important issues faced by control systems engineers working in this area including fundamental approaches to neurocontrol viewed as optimization tasks neural network architectures for neurocontrol learning algorithms viewed as optimization algorithms identification of plant models from measured data training of an optimal neurocontroller robustness adaptiveness stability and other special topics implementation of neurocontrol applications supplemented with case studies of real world industrial control applications from car drive train control to wastewater treatment plant control neurocontrol is an important professional reference for control engineers in a wide range of industries as well as for automatic control and adaptive control researchers it is also an excellent text for graduate and senior undergraduate students in neurocontrol and automatic control

the symposium covered three major areas adaptive control identification and signal processing in all three new developments were discussed covering both theoretical and applications research within the subject area of adaptive control the discussion centred around the challenges of robust control design to unmodelled dynamics robust parameter estimation and enhanced performance from the estimator while the papers on identification took the theme of it being a bridge between adaptive control

and signal processing the final area looked at two aspects of signal processing recursive estimation and adaptive filters
