throughout history there has existed an extraordinary relationship between humans and ravens ravens like early humans are scavengers on the kills of great carnivores as scavengers ravens were associated with hunters they found in the north wolves and later men the trinity of wolf man and

raven in the hunt is an ancient one in considering the appeal of the raven bernd heinrich suspects that a meeting of the minds might reside in that hunting trinity heinrich involves us in his quest to get inside the mind of the raven at the heart of this book are heinrich's love and respect for these complex and engaging creatures and through his keen observation and analysis students become their intimates too an amazing book heinrich has documented a level of intelligence and social sophistication rarely even dreamed to exist in birds he is a scientist and naturalist of the first rank as mind of the raven illustrates a nature writer of uncommon talent edward o wilson

the coauthor of the award winning in the company of crows and ravens and his wife an animal behavior expert offer an engaging account of their days as young field biologists in maine twenty years ago fresh out of graduate school and recently married john and colleen marzluff left arizona for a small cabin in the mountains of western maine their mission to conduct the first ever extensive study of the winter ecology of the common raven under the tutelage of biologist bernd heinrich drawing on field notes and personal diaries they vividly and eloquently chronicle their three year endeavor to research a mysterious and often misunderstood bird assembling a gigantic aviary climbing sentry trees building bird blinds in the forest capturing and sustaining 300 ravens as study subjects and enduring harsh maine winters in pursuit of their goal they also shared the unique challenges and joys of raising training and racing the sled dogs that assisted them in their work accompanied by evon zerbetz's lovely linocut illustrations dog days raven nights is a fascinating behind the scenes look at the adventures of field science and an insightful exploration of the nature of relationships both animal and human

consciousness is undoubtedly one of the last remaining scientific mysteries and hence one of the greatest contemporary scientific challenges how does the brain's activity result in the rich phenomenology that characterizes our waking life are animals conscious why did consciousness evolve how does science proceed to answer such questions can we define what consciousness is can we measure it can we use experimental results to further our understanding of disorders of consciousness such as those seen in schizophrenia delirium or altered states of consciousness these questions are at the heart of contemporary research in the domain answering them requires a fundamentally interdisciplinary approach that engages not only philosophers but also neuroscientists and psychologists in a joint effort to develop novel approaches that reflect both the stunning recent advances in imaging methods as well as the continuing refinement of our concepts of consciousness in this light the oxford companion to consciousness is the most complete authoritative survey of contemporary research on consciousness five years in the making and including over 250 concise entries written by leaders in the field the volume covers both fundamental knowledge as well as more recent advances in this rapidly changing domain structured as an easy to use dictionary and extensively cross referenced the companion offers contributions from philosophy of mind to neuroscience from experimental psychology to clinical findings so reflecting the profoundly interdisciplinary nature of the domain

particular care has been taken to ensure that each of the entries is accessible to the general reader and that the overall volume represents a comprehensive snapshot of the contemporary study of consciousness the result is a unique compendium that will prove indispensable to anyone interested in consciousness from beginning students wishing to clarify a concept to professional consciousness researchers looking for the best characterization of a particular phenomenon

crows and people share similar traits and social strategies to a surprising extent to know the crow is to know ourselves from the preface from the cave walls at lascaux to the last painting by van gogh from the works of shakespeare to those of mark twain there is clear evidence that crows and ravens influence human culture yet this influence is not unidirectional say the authors of this fascinating book people profoundly influence crow culture ecology and evolution as well john marzluff and tony angell examine the often surprising ways that crows and humans interact the authors contend that those interactions reflect a process of cultural coevolution they offer a challenging new view of the human crow dynamic a view that may change our thinking not only about crows but also about ourselves featuring more than 100 original drawings the book takes a close look at the influences people have had on the lives of crows throughout history and at the significant ways crows have altered human lives in the company of crows and ravens illuminates the entwined histories of crows and people and concludes with an intriguing discussion of the crow human relationship and how our attitudes toward crows may affect our cultural trajectory

the fifty seven original essays in this book provide a comprehensive overview of the interdisciplinary field of animal cognition the contributors include cognitive ethologists behavioral ecologists experimental and developmental psychologists behaviorists philosophers neuroscientists computer scientists and modelers field biologists and others the diversity of approaches is both philosophical and methodological with contributors demonstrating various degrees of acceptance or disdain for such terms as consciousness and varying degrees of concern for laboratory experimentation versus naturalistic research in addition to primates particularly the nonhuman great apes the animals discussed include antelopes bees dogs dolphins earthworms fish hyenas parrots prairie dogs rats ravens sea lions snakes spiders and squirrels the topics include but are not limited to definitions of cognition the role of anecdotes in the study of animal cognition anthropomorphism attention perception learning memory thinking consciousness intentionality communication planning play aggression dominance predation recognition assessment of self and others social knowledge empathy conflict resolution reproduction parent young interactions and caregiving ecology evolution kin selection and neuroethology
