method the nature of nature is the first of several volumes exposing edgar morin s general systems view on life and society the present volume maintains that the organization of all life and society necessitates the simultaneous interplay of order and disorder all systems physical biological social political and informational incessantly reshape part and whole through feedback thereby generating increasingly complex systems for continued evolution these simultaneously complementary concurrent and antagonistic systems require a priority of love over truth of subject over object of sybernetics over cybernetics

christopher alexander s series of ground breaking books including a pattern language and the timeless way of building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns now in the nature of order alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities in the phenomenon of life the first volume in this four volume masterwork alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture with this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region he introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built alexander argues that living structure is at once both personal and structural taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart a step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united

gottfried wilhelm leibniz 1646 1716 one of the most prominent figures in both the history of philosophy and the history of mathematics but also one of the greatest advocates of christian unity of the early modern period may just have the solution to divisions within the church with his unique understanding of the nature of the church leibniz s unique theological metaphysics and pioneering thought on the centrality of the concept of person makes his ideas on the nature of the church particularly promising the book presents how leibniz s ideas are formed by history and meetings with extraordinary figures and how these ideas mature and develop through time into

a theological metaphysics and much later as a philosophy of personalism that secures leibniz's place as an early pioneer of the philosophical movement of personalism leibniz on the nature of the church presents a historical systematic and provocative reading of these until now overlooked ideas

many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication but there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other these volumes contain the main contributions that have been made within each of these streams of thought the selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective a new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents

the intellectual and cultural battles now raging over theism and atheism conservatism and secular progressivism dualism and monism realism and antirealism and transcendent reality versus material reality extend even into the scientific disciplines this stunning new volume captures this titanic clash of worldviews among those who have thought most deeply about the nature of science and of the universe itself unmatched in its breadth and scope the nature of nature brings together some of the most influential scientists scholars and public intellectuals including three nobel laureates across a wide spectrum of disciplines and schools of thought here they grapple with a perennial question that has been made all the more pressing by recent advances in the natural sciences is the fundamental explanatory principle of the universe life and self-conscious awareness to be found in inanimate matter or immaterial mind the answers found in this book have profound implications for what it means to do science what it means to be human and what the future holds for all of us

the nature of life presents a totally new way of looking at the world and how we live this 600 page textbook offers a new all encompassing model for wholistic healing and natural living it provides us with the means of bringing together all existing fields of thought philosophy religion science mathematics language art and music this comprehensive book presents detailed charts tables and flowcharts that will enable you to navigate your way through life it will empower you with the ability to transcend the negative influences in the world and remain grounded in a true sense of being brian presents key tools that allow us to consciously remain in a natural state of empowerment whilst living in the modern world it is not just a book it is a map a tool a path and a work of art explaining how we can bring everything into the present moment and deliberately move towards a future only ever dreamed possible
