although ideally a patent system for pharmaceuticals should serve to incentivize research into the development of new medicines the covid 19 pandemic has exposed the equal importance of drug access and affordability this book by focusing on the brazilian rule which makes the grant of pharmaceutical patents dependent on the prior consent of the national health surveillance agency anvisa shows how

the brazilian model affords an example for other countries to follow in dealing with tensions between patent protection and the right to healthcare based on an empirical study in which the author examined 147 reports issued by anvisa as a basis for its decisions the book deals with such central questions concerning the interface of regulation and innovation in the patent system as the following compatibility between anvisa's prior consent mechanism and the trade related aspects of intellectual property rights trips agreement how evergreening and trivial patents undermine public health and access to medicines ways of correcting abuses of patent rights and controlling quality of patents and the discourse on health as a human right along with her examination of anvisa reports the author analyzes how article 229 c lpi which introduced the need of anvisa's prior consent to the patent grant of pharmaceuticals in brazil has been interpreted in brazilian case law interviews with brazilian experts are also included in its commitment to harmonizing patent rights and the right to access of affordable medicines brazil's patent system for pharmaceuticals stands out as a workable response to the basic problem of access to medicines in the developing world by describing the successes and failures in the brazilian policy of promoting drug access this book helps policymakers in developing and emerging countries to better explore trips flexibilities when dealing with similar problems and provides practitioners in the law of the world trade organization patent law competition law and health law with a guide to how a more equitable pharmaceutical patenting system could work in practice

brazil is a country of extreme inequalities one of the most important of which is the acute concentration of rural land ownership in recent decades however poor landless workers have mounted a major challenge to this state of affairs a broad grassroots social movement led by the movement of landless rural workers mst has mobilized hundreds of thousands of families to pressure authorities for land reform through mass protest this book explores the evolution of the landless movement from its birth during the twilight years of brazil's military dictatorship through the first government of luiz inácio lula da silva it uses this case to test a number of major theoretical perspectives on social movements and engages in a critical dialogue with both contemporary political opportunity theory and mancur olson's classic economic theory of collective action ondetti seeks to explain the major moments of change in the landless movement's growth trajectory its initial emergence in the late 1970s and early 80s its rapid takeoff in the mid 1990s its acute but

ultimately temporary crisis in the early 2000s and its resurgence during lula's first term in office he finds strong support for the influential but much criticized political opportunity perspective at the same time however he underscores some of the problems with how political opportunity has been conceptualized in the past the book also seeks to shed light on the anomalous fact that the landless movement continued to expand in the decade following the restoration of brazilian democracy in 1985 despite the general trend toward social movement decline his argument which highlights the unusual structure of incentives involved in the struggle for land in brazil casts doubt on a key assumption underlying olson's theory
