after fifteen years of teaching anthropology at a large university rebekah nathan had become baffled by her own students their strange behavior eating meals at their desks not completing reading assignments remaining silent through class discussions made her feel as if she were dealing with a completely foreign culture so nathan decided to do what anthropologists do when confused by a different culture go live with them she enrolled as a freshman moved into the dorm ate in the dining hall and took a full load of courses and she came to understand that being a student is a pretty difficult job too her discoveries about contemporary undergraduate culture are surprising and her observations are invaluable making my freshman year essential reading for students parents faculty and anyone interested in educational policy

the research process in this book begins with identification of the research question and proceeds through each step including planning data collection actual collection and analysis of the data and writing the report this text proceeds through multiple methodologies including experimental and non experimental quantitative and qualitative at every step the emphasis is on planning and executing the study key features o simulations and feedback that may be used in class sessions for both individual and small group participation o pedagogy to help students plan and conduct a research project in an actual classroom o examples that demonstrate and explain what constitutes good and poor research questions o case studies and real life examples related to education o a student site that provides students with the opportunity to interact with contemporary articles this book provides an introduction to research that emphasizes the fundamental concepts of planning and design it is designed to be a core text for the very first course on research methods

a sweeping assessment of the state of higher education today from former harvard president derek bok higher education in america is a landmark work a comprehensive and authoritative analysis of the current condition of our colleges and universities

from former harvard president derek bok one of the nation s most respected education experts sweepingly ambitious in scope this is a deeply informed and balanced assessment of the many strengths as well as the weaknesses of american higher education today at a time when colleges and universities have never been more important to the lives and opportunities of students or to the progress and prosperity of the nation bok provides a thorough examination of the entire system public and private from community colleges and small liberal arts colleges to great universities with their research programs and their medical law and business schools drawing on the most reliable studies and data he determines which criticisms of higher education are unfounded or exaggerated which are issues of genuine concern and what can be done to improve matters some of the subjects considered are long standing such as debates over the undergraduate curriculum and concerns over rising college costs others are more recent such as the rise of for profit institutions and massive open online courses moocs additional topics include the quality of undergraduate education the stagnating levels of college graduation the problems of university governance the strengths and weaknesses of graduate and professional education the environment for research and the benefits and drawbacks of the pervasive competition among american colleges and universities offering a rare survey and evaluation of american higher education as a whole this book provides a solid basis for a fresh public discussion about what the system is doing right what it needs to do better and how the next quarter century could be made a period of progress rather than decline

in spite of soaring tuition costs more and more students go to college every year a bachelor s degree is now required for entry into a growing number of professions and some parents begin planning for the expense of sending their kids to college when they re born almost everyone strives to go but almost no one asks the fundamental question posed by academically adrift are undergraduates really learning anything once they get there for a large proportion of students richard arum and josipa roksa s answer to that question is a definitive no their extensive research draws on survey responses transcript data and for the first time the state of the art collegiate learning assessment a standardized test administered to students in their first semester and then again at the end of their second year according to their analysis of more than 2 300 undergraduates at twenty four institutions 45

percent of these students demonstrate no significant improvement in a range of skills including critical thinking complex reasoning and writing during their first two years of college as troubling as their findings are arum and rokxa argue that for many faculty and administrators they will come as no surprise instead they are the expected result of a student body distracted by socializing or working and an institutional culture that puts undergraduate learning close to the bottom of the priority list academically adrift holds sobering lessons for students faculty administrators policy makers and parents all of whom are implicated in promoting or at least ignoring contemporary campus culture higher education faces crises on a number of fronts but arum and rokxa s report that colleges are failing at their most basic mission will demand the attention of us all

the award winning and widely read first edition of catholic social learning educating the faith that does justice published in 2011 described the critical edge of the tradition of justice pedagogy in catholic higher education at the end of the first decade of the twenty first century but living traditions change in response to new challenges and develop their own resources more fully the most obvious and compelling development in recent years has been the publication in 2015 of pope francis landmark encyclical *laudato si* on care for our common home the occasion for the new chapter length afterword to this expanded edition of catholic social learning the urgent imperative to defend creation is a major but not the only reason for a new edition two new chapters on the many forms of shame as a pedagogical issue and on the book of job and belief in a just world add spiritual and theological depth to the original assessment of more than a decade ago those three additions comprise the totally new part iv the critical edge of the tradition a new preface sets the argument in the context of current controversies over the place of painful emotions in educational settings

this book uses controversies as a gateway through which to explore the origins ethics key moments and people in the history of

anthropology it draws on a variety of cases including complicity in human zoos malinowski s diaries and the human terrain system to explore how anthropological controversies act as a driving force for change how they offer a window into the history of and research practice in the discipline and how they might frame wider debates such as those around reflexivity cultural relativism and the politics of representation the volume provokes discussion about research ethics and practice with tangible examples where gray areas are brought into sharp relief the controversies examined in the book all involve moral or practical ambiguities that offer an opportunity for students to engage with the debate and the dilemmas faced by anthropologists both in relation to the specific incidents covered and to the problems posed more generally due to the intimate and political implications of ethnographic research
