pig farming is one of the most lucrative and profitable livestock businesses anyone can think of most people who have started the pig rearing business have seen so much success already it s saddening anyway that despite the huge profits obtainable in owning a piggery many are still overlooking this goldmine while many who engage in pig farming do so as a part time business a lot of people are ignorant of how it works if you can engage in this business fully you are sure going to smile your way to the bank very soon farming pigs is more challenging than farming other forms of livestock such as cattle or goats owing to the fact that they are more sensitive to the environment climate and require more attention but on the other hand if they are properly taken care a single sow can give birth up to 12 piglets in a gestation period of 130 days and they are ready for the market far sooner than most of the other livestock animals there are a multitude of pig species available throughout the world for setting up it is better to use local breeds because they are already adapt to the climate and are easily available within the area for breeding them it is better to start with piglets grow and sell them since you will be able to gain experience during the process in addition to being able to develop management protocols your management expertise should be sound since breeding is far more complicated than rearing pigs good feed is necessary for growth body maintenance and the production of meat and milk you can use locally available feeds

that are less expensive but can be nutritionally complete when properly prepared in fact pigs can be fed well using only kitchen scraps from a family s household the nutritional needs of pigs can be divided into six categories or classes these are water carbohydrates fats proteins vitamins and minerals
