data communications and networks uses a top down internet focussed approach to tackle the problem of communication system design an integrated approach is taken to networks and data communications with an emphasis that starts from the top level requirements and works downwards describing how such requirements are fulfilled by lower layers of the transmission chain while the book contains sufficient detail to provide an excellent foundation clarity is paramount and care is taken not to swamp the reader with information to the

point where the underlying concepts are obscured the internet is used as the principle example of a communication system allowing the reader to follow the system from the application layers with source coding and security through the network with naming and routing algorithms down to transport and physical aspects of a communication system modern techniques such as mobile radio voice over ip and asdl are covered while more traditional aspects such as circuit switching which still form a significant part of current systems are not overlooked by providing a technical introduction and including application examples this text will have significant appeal to final year students postgraduates and professionals with a science or engineering background wishing to gain a basic understanding of the key concepts behind data communications engineering

hydrostatic and hybrid bearing design is a 15 chapter book that focuses on the bearing design and testing this book first describes the application of hydrostatic bearings as well as the device pressure flow force power and temperature subsequent chapters discuss the load and flow rate of thrust pads circuit design flow control load and stiffness and the basis of the design procedures and selection of tolerances the specific types of bearings their design dynamics and experimental methods and testing are also shown this book will be very valuable to students of engineering design and lubrication

this is a lengthy intellectual journal by a political radical that ranges over a variety of subjects such as marxism capitalism history many schools of modern philosophy psychology economics and contemporary american politics it also includes quite a few personal passages but i ve kept those only because they express common experiences and youthful psychological tendencies its most useful content for students might be its many summaries of good historical and scientific scholarship especially in the journal s second half ultimately the document is a fairly comprehensive expression of a particular society as refracted through an inquisitive and critical mind from the ages of 15 to 44

when will we understand that water has memory water is alive and the time for her to awaken is now what will humanity do if the scarcity of water becomes a reality and not just a subject for movies why can t we comprehend that we are made of structured water and that by disrespecting the water we disrespect ourselves since the creation of earth water and crystals have weaved their paths into a billion year long tapestry that has captured the cycles of nature s evolution it has observed the appearance of humans and their troubled but fascinating development and the energies and vibrations of everything that is part of this amazing eco system in 2055 water activists are fighting against irresponsible corporations that pillage the earth hayyin the hidden identity of cherry mortinger a limnologist is leading the movement will she be able to prove that water has memory and is alive and that we could awaken to the possibility of facing a fierce battle against the primordial element that gave us life water although many are not willing to accept that water has memory and is alive this book awakens us to the possibility of fighting a fierce battle against the primordial element that gave us life water

the fourth edition of this long established text retains all the key features of the previous editions covering the basic topics of a solid first course in mathematical logic this edition includes an extensive appendix on second order logic a section on set theory with urlements and a section on the logic that results when we allow models with empty domains the text

contains numerous exercises and an appendix furnishes answers to many of them introduction to mathematical logic includes propositional logic first order logic first order number theory and the incompleteness and undecidability theorems of gödel rosser church and tarski axiomatic set theory theory of computability the study of mathematical logic axiomatic set theory and computability theory provides an understanding of the fundamental assumptions and proof techniques that form basis of mathematics logic and computability theory have also become indispensable tools in theoretical computer science including artificial intelligence introduction to mathematical logic covers these topics in a clear reader friendly style that will be valued by anyone working in computer science as well as lecturers and researchers in mathematics philosophy and related fields
