Korten Eugen Varga David Schweickart P. J. Devine Michael Albert*

author of national bestseller *Life After Google* and generation defining *Wealth and Poverty* venture capitalist futurist and pioneering thinker extraordinaire George Gilder pinpoints how the clash of creativity with power at the heart of economic systems leads to global cognitive dissonance and argues that the creation of the novel taps capitalism's infinite promise and is humanity's only path of escape from stagnation and tyranny. Gilder once more rocks the archetypes of modern information theory and economics with a paradigm shifting salvo of sheer brilliance. The capitalist era is over. Get ready for life after capitalism. For more than two hundred years capitalism spread wealth around the globe bringing unprecedented prosperity and progress liberating human potential. But something has gone terribly wrong in the world economy. Creativity and faith in the future capitalism's crucial ingredients seem to have run out. The elites think they can maintain a nation's wealth by printing money and investing it in favored industries. Their trust in bureaucratic experts, their cautionary paranoia and their delusional belief that they can control everything from the spread of a virus to the weather are sucking the life out of the economy. Ordinary people, their freedoms restricted, their prospects dim, are losing their faith in their institutions. Such misguided corporatism and pride, confusion and despair are the result of a deep misunderstanding of capitalism itself. The bestselling futurist and venture capitalist George Gilder explains why economics is not an incentive system to be manipulated but an information system to be freed. Material resources are essentially as plentiful as the atoms of the universe. What drives economic growth in a free market is our limitless human ingenuity and creativity. Prophetic, inspiring and paradigm shifting, *Life After Capitalism* is a once in a generation classic.

It is easier to imagine the end of the world, the theorist Fredric Jameson has remarked, than to imagine the end of capitalism. Jacobin editor Peter Frase argues that technological advancements

and environmental threats will inevitably push our society beyond capitalism and four futures imagines just how this might look extrapolating possible futures from current changes the world is now experiencing and drawing upon speculative fictions to illustrate how these futures might be realized four futures examines communism rentism socialism and exterminism or in other words the socialisms we may reach if a resurgent left is successful and the barbarisms we may be consigned to if those movements fail

much is said about the wrongs of capitalism less on what might replace it andy hines analyzes the options and offers 3 guiding images an environmentally driven circular commons a socially driven non workers paradise a technology driven tech led abundance there are positive alternatives and it s time to get started

how design can transcend the logics structures and subjectivities of capitalism a framework theoretical grounding and practical principles the designed things experiences and symbols that we use to perceive understand and perform our everyday lives are much more than just props they directly shape how we live in design after capitalism matthew wizinsky argues that the world of industrial capitalism that gave birth to modern design has been dramatically transformed design today needs to reorient itself toward deliberate transitions of everyday politics social relations and economies looking at design through the lens of political economy wizinsky calls for the field to transcend the logics structures and subjectivities of capitalism to combine design entrepreneurship with social empowerment in order to facilitate new ways of producing those things symbols and experiences that make up everyday life after analyzing the parallel histories of capitalism and design wizinsky offers some historical examples of anticapitalist noncapitalist and postcapitalist models of design practice these range from the british arts and crafts movement of the nineteenth century to contemporary practices of growing furniture or biotextiles and automated forms of production drawing on insights from sociology philosophy economics political science history environmental and sustainability studies and critical theory fields not usually seen as central to design he lays out core principles for postcapitalist design offers strategies for applying these principles to the three layers of project practice and discipline and provides a set of practical guidelines for designers to use as a starting point the work of postcapitalist design can start today wizinsky says with the next project

the world will not live without logos but neither will capitalism silently take over democracy what comes next forget capitalism and the class struggle we are witnessing the birth of a whole new world the digital revolution is in fact changing things far more dramatically then the hype mongers of tech internet ever imagined only not in the way that they and their investors hoped the move from a society dominated by print and broadcast mass media to the age of interactivity is at least as dramatic as the move from feudalism to capitalism after capitalism comes attentionalism those who can harness global networks of information and master new forms of communication will control business finance and legislation forming the new business and government elites they will inherit the power they are the netocracy

from thomas piketty to david harvey scholars are increasingly questioning whether we are entering into a post capitalist era if so does this new epoch signal the failure of capitalism and emergence of alternative systems or does it mark the ultimate triumph of capitalism as it evolves into an unstoppable entity that takes new forms as it engulfs its opposition after capitalism brings together leading scholars from across the academy to offer competing perspectives on capitalism s past

incarnations present conditions and possible futures some contributors reassess classic theorizations of capitalism in light of recent trends including real estate bubbles debt relief protests and the rise of a global creditocracy others examine marx's writings unemployment hoarding capitalist realism and coyote trickster capitalism among many other topics media and design trends locate the key ideologies of the current economic moment with authors considering everything from the austerity aesthetics of reality tv to the seductive smoothness of liquid crystal even as it draws momentous conclusions about global economic phenomena after capitalism also pays close attention to locales as varied as cuba india and latvia examining the very different ways that economic conditions have affected the relationship between the state and its citizens collectively these essays raise provocative questions about how we should imagine capitalism in the twenty first century will capitalism like all economic systems come to an end or does there exist in history or elsewhere a hidden world that is already post capitalist offering alternative possibilities for thought and action

capitalism as a global system barely allows the needs of the majority of the world's population to be met whether from an industrialized country such as the us or from south africa the need for an alternative can be felt all over the world it is clear nowadays that due to the non democratic nature and inadequacies of capitalism another system must take its place such a process has already begun through the cooperative movement which this book examines along with other initiatives featuring essays by international scholars and activists from various spheres of the anti capitalist left the work features many examples from the north and the south to cover both the historically advanced and late capitalist economies it discusses such initiatives as participatory economics the mondragon experience worker cooperatives in europe and latin america solidarity economy in south africa and more written in an accessible manner beyond capitalism will be an invaluable resource for any student of social movements and political thought and for anyone looking for alternative to today's ongoing systemic crises

there is no alternative has been the unofficial mantra of the neoliberal order since its utterance by margaret thatcher in the 1980s however there is an alternative to our crisis ridden austerity inflicted world and not just one alternative but many challenging the arguments for markets mainstream economics and capitalism from adam smith onwards economics after capitalism provides a step by step guide to various writers movements and schools of thought critical of neoliberal globalisation these range from keynesian inspired reformists such as gerge soros and joseph stiglitz critics of inequality like thomas piketty and amartya sen to more radical voices including naomi klein marxists such as david harvey anarchists and autonomists including toni negri and michael hardt by providing a clear and accessible guide to the economics of anti capitalism derek wall successfully demonstrates that an open source eco socialist alternative to rampant climate change elite rule and financial chaos is not just necessary but possible

this book examines the antagonistic relationship between new european nationalisms as these often go hand in hand with populism and the phenomenon of migration migration has become a significant issue both in europe and the whole world although it has always existed much of public opinion sees it now as a problem the latter has been exaggerated through a crisis in hospitality exacerbated by the relatively recently constructed and misplaced feeling of a civilisational threat from islam migration is then countered by the escalation of new nationalisms at least some of which are supported by populism this book offers an understanding of this conjunction of migration and nationalism in the post cold war european context more specifically the book takes

up how the end of the simplified cold war cognitive binary means an unprecedented epistemological confusion and depoliticisation which takes migration as its target but could resort to other targets too discussing the postcolonial background to the new migrations the book also considers womens rights postsocialism and the relevance of the current pandemic as the issue of migration is addressed in the context of the european crisis ridden present this wide ranging interrogation of how contemporary european migration is conceived and understood will appeal to students academics activists policy makers and others with interests in contemporary migration new nationalisms populism feminism colonial postcolonial and decolonial issues as well as socialism and postsocialism
