metabolism was a movement launched in japan that took inspiration for buildings and cities from biological systems with interviews and commentary and hundreds of images project japan unearths a history that casts new light on the key issues that both enervate and motivate architecture today

contemporary japanese architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation it separates out the young generation of japanese architects

from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of japan and a shifting global order salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author by combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary japanese architecture

this project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology the epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture the form of the organism was thought to calibrate modernism s infinite extension the architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks what is retained from the modernity of yesterday is the ideology of endless self generation revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence ai networks the essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science they range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks this book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally

this book examines the impact of the cold war in a global context and focuses on city scale reactions to the atomic warfare it explores urbanism as a weapon to combat the dangers of the communist intrusion into the american territories and promote living standards for the urban poor in the us cities the cold war saw the birth of atomic urbanisation central to which were planning politics and cultural

practices of the newly emerged cities this book examines cities in the arctic europe asia and australasia in detail to reveal how military political resistance and cultural practices impacted on the spaces of everyday life it probes questions of city planning and development such as how did the threat of nuclear war affect planning at a range of geographic scales what were the patterns of the built environment architectural forms and material aesthetics of atomic urbanism in difference places and how did the bomb manifest itself in civic governance popular media arts and academia understanding the age of atomic urbanism can help meet the contemporary challenges that cities are facing the book delivers a new dimension to the existing debates of the ideologically opposed superpowers and their allies their hemispherical geopolitical struggles and helps to understand decades of growth post second world war by foregrounding the cold war

the constructed other argues that the assumed otherness of japanese architecture has made it both a testbed for western architectural theories and a source of inspiration for western designers the book traces three recurring themes in western accounts of japanese architecture from the reopening of japan in the mid nineteenth century to the present day a wish to see western architectural theories reflected in japanese buildings efforts to integrate elements of japanese architecture into western buildings and a desire to connect contemporary japanese architecture with japanese tradition it is suggested that together these narratives have had the effect of creating what amounts to a mythical version of japanese architecture often at odds with historical fact but which has exercised a powerful influence on the development of building design internationally

collage and architecture remains an invaluable resource for students and practitioners as the first book to cover collage as a tool for analysis and design in architecture since entering the contemporary art world over a century ago collage has profoundly influenced artists and architects throughout the twentieth century and into the twenty first in collage and architecture jennifer a e shields explores its influence using the artworks and built projects of leading artists and architects such as mies van der rohe daniel libeskind and teddy cruz to illustrate the diversity of collage techniques this new edition includes a stronger focus on contemporary practices including digital methods new designers and architects including marshall brown wai architecture think tank and tatiana bilbao bringing their methods and work to life an expanded global and diverse perspective of architecture as collage collage is an important instrument for analysis and design through its 261 color images this book shows how this versatile medium can be adapted and transformed in your own work
