costs of healthy diets are worryingly rising in a number of developed and emerging economies however less

is known on these costs for developing countries using price data from a large number of markets in ethiopia we find that real prices of all nutritionally rich food groups increased significantly between 19 and 62 percent over the period 2007 to 2016 this contrasts with 1 staple crops grains roots and tubers which did not show any price increase and 2 oils fats and sugar the prices of which decreased substantially using detailed nationwide datasets and relying on time series methods we link these price increases to changes in local markets demand and supply factors transaction costs and international trade we find that prices of nutritionally rich food groups compared to cereals are relatively less affected by international trade and exchange rate changes but more so by rapidly increasing local and city demand this rising demand is likely due to recent income growth and rapid urbanization and the high income elasticities for nutritious foods in ethiopia moreover we find that local production changes affected prices of nutritious items little but national price rises were found to have been significantly linked with food price rises in commercial clusters in the country changes in transaction costs fuel and transport costs explained relatively little of the observed food price changes
