once upon a time on grounds of both religion and common sense people assumed that the earth was flat and that the sun literally rose and set each day when newly developing knowledge made those beliefs untenable giving them up was difficult today the belief that only one of the world s various religions is true for all people on earth is equivalent to the belief in a flat earth both notions have become untenable given contemporary knowledge about religion even though many people are still troubled by the existence of religious diversity today that diversity is a fact of life religious diversity should be no more troubling to religious people than the fact that the earth is round and circles the sun this provocative book based on the author s longtime practice of buddhism and comparative study of religion provides tools with which one can truly appreciate religious diversity as a gift and resource rather than as a deficiency or a problem to be overcome after we accept diversity as inevitable and become comfortable with it diversity always enriches life both nature and culture

prior to the collapse of Communism Romanian historical movies were political encouraging nationalistic feelings and devotion to the state Vlad the Impaler and other such iconic figures emerged as heroes rather than loathsome bloodsuckers celebrating a shared sense of belonging the past decade has however presented Romanian films in which ordinary people are the stars heroes go getters swindlers and sore losers the author explores a wide selection old and new of films set in the Romanian past

Tricky Design responds to the burgeoning of scholarly interest in the cultural meanings of objects by addressing the moral complexity of certain designed objects and systems the volume brings together leading international designers scholars and critics to explore some of the ways in which the practice of design and its outcomes can have a dark side even when the intention is to design for the public good considering a range of designed objects and relationships including guns eyewear assisted suicide kits anti-rape devices passports and prisons the contributors offer a view of design as both progressive and problematic able to propose new material and human relationships yet also constrained by social norms and ideology this contradictory tricky quality of design is explored in the editors' introduction which positions the objects systems services and things discussed in the book in relation to the idea of the trickster that occurs in anthropological literature as well as in classical thought discussing design interventions that have positive and negative ethical consequences these will include objects both material and immaterial systems

with both local and global scope and also different processes of designing this important new volume brings a fresh perspective to the complex nature of things and makes a truly original contribution to debates in design ethics design philosophy and material culture
