compositional choices and meaning in the vocal music of j s bach collects seventeen essays by leading bach scholars the authors each address in some way such questions of meaning in j s bach's vocal compositions including his passions masses magnificat and cantatas with particular attention to how such meaning arises out of the intentionality of bach's own compositional choices or in part iv in particular how meaning is discovered and created through the reception of bach's vocal works and the authors do not consider such compositional choices in a vacuum but rather discuss bach's artistic intentions within the framework of broader cultural trends social historical theological musical etc such questions of compositional choice and meaning frame the four primary approaches to bach's vocal music taken by the authors in this volume as seen across the book's four parts part i how might the study of historical theology inform our understanding of bach's compositional choices in his music for the church cantatas passions masses part ii how can we apply traditional analytical tools to understand better how bach's compositions

were created and how they might have been heard by his contemporaries part iii what we can understand anew through the study of bach's self borrowing i.e. parody which always changed the earlier meaning of a composition through changes in textual content compositional characteristics the work's context within a larger composition and often the performance context from court to church for example part iv what can the study of reception teach us about a work's meaning's in bach's time during the time of his immediate successors and at various points since then including our present the chapters in this volume thus reflect the breadth of current bach research in its attention not only to source study and analysis but also to meanings and contexts for understanding bach's compositions
