terry returned from saudi arabia in the may of 1978 after a year in the kingdom with a spring in his step and over flowing with enthusiasm feeling that he could secure a job using the experience he had gained during his time in operations engineering in the eastern province of saudi having cut his teeth in a demanding environment and coming out the other end full of ambition to move on in the petroleum industry and how soon he was to discover it was not to be as easy as he first thought experiencing an educational system of the 50 s and the inadequacies of that system made terry realise at an early age that things don t come simple and if you really want something then you had better be prepared to work hard to get it coming back from saudi arabia after soaking up so much experience in the petroleum industry he expected to walk into employment without any

problems when that was not the case it was like another wakeup call and reasserted what terry had previously experienced that nothing comes without an inner drive from yourself to make it happen originally his wife and himself had agreed that he would work in saudi arabia for two years but at the end of the first year and in the fifth week of his six weeks leave period after which terry was supposed to return they realised that neither relished the idea of being apart from each other and terry being away from his family for another year he was only too willing to agree that he needed to seek work nearer home and so the search began in july 1978 after many interviews and rejected contracts he finally found his dream job in the north sea petroleum industry and his career takes off with an engineering construction company he remained with for over thirty years the book tells of the projects and people he was engaged with including many adventures and events that transpired over the span of his career

for 10 000 years before any european immigrants arrived on the north american continent native american indians engaged in a communal lifestyle from 1600 to 1791 american colonists established a thriving home production economy and having ownership of their tools or means of production they produced everything they needed to survive they were self reliant and the american colonists sold their excess goods to merchants who resold them for a profit by 1791 the merchants were able to start the first textile factories as a result which brought an abrupt end to the home production economy and the beginning of american capitalism former independent colonists were now forced into the textile factory and the first wage contract appeared in america the wage contract also set in motion a contradiction between the capitalist owners of the means of production and the new american working class the wage contract allowed the owners of working class labor and the instruments of production to evolve into an american ruling class and the producers of all commodities and wealth became the american working class people wage workers class because of their divergent interests the two classes formed a class contradiction and the latter became known as the capitalist american ruling class opposite and the american working class opposite people wage workers this development occurred mainly in the northern factory economy while in the south uncompensated african slave labor was dominant which was owned by an american slaveholding class by 1860 the contradiction between the capitalist american ruling class opposite owner of the wage labor system came into a head on contradiction with uncompensated african slave labor and a bloody civil war was fought to determine which type of means of production would prevail and dominate during the 20th century the south was defeated and the wage contract system became nationalized therefore throughout the twentieth century including the beginning of the new millennium the

capitalist american ruling class opposite expropriated the labor s product of the american working class opposite people wage workers which resulted in this class accumulation of multiple billions of dollars of surplus value and simultaneously this loss translated into the american working class opposite people wage workers increasing alienation estrangement loss self identity self expression and freedom
