in the division of christendom revered historian hans j hillerbrand details the events and ideas of the sixteenth century and contends that the protestant reformation must be seen as an interplay of religious political and economic forces in which religion played a major role hillerbrand tells the fascinating story of the ways in which theological disagreements divided the centuries old christian church and the roles that leading characters such as luther zwingli anabaptists and calvin played in establishing new churches even as roman catholicism continued to develop in its own ways the book covers all significant aspects of this period and interprets these important events in their own context while reflecting on the consequences of the reformation for later periods and for today

this is the study of an anonymous ancient work usually called joseph and aseneth which narrates the transformation of the daughter of an egyptian priest into an acceptable spouse for the biblical joseph whose marriage to aseneth is given brief notice in genesis kraemer takes issue with the scholarly consensus that the tale is a jewish conversion story composed no later than the early second century c e instead she dates it to the third or fourth century c e and argues that although no definitive answer is presently possible it may well be a christian account this critique also raises larger issues about the dating and identification of many similar writings known as pseudepigrapha kraemer reads its account of aseneth s interactions with an angelic double of joseph in the context of ancient accounts of encounters with powerful divine beings including the sun god helios and of neoplatonic ideas about the fate of souls when aseneth met joseph demonstrates the centrality of ideas about gender in the representation of aseneth and by extension offers implications for broader concerns about gender in late antiquity
