ever since 9 11 it s been clear we need a new approach to terrorism in this timely and
important book the authors show the root causes of terrorism the links between
trauma and fundamentalism why people become suicide bombers why peace
processes collapse whether non violence is a useful response what can be done clear
radical and extremely persuasive making terrorism history shows why political
violence is now such a major force in our world at the same time it gives a range of

practical actions that can be taken to combat it not only by our governments but also on the ground in Iraq Israel and Palestine and more widely in addition there are many simple but effective steps that we too can take within our local communities to make peace not war on terror

In this innovative study Michel Wieviorka applies interventionist sociology to a comparative analysis of Italian Peruvian Basque and Middle Eastern terrorist groups through staged confrontations between terrorists and their targets and extensive interviews with both parties he throws new light on the terrorists and their relationships both to the movements they represent and the social institutions they attempt to destroy. Wieviorka demonstrates that the truly terrorist actor has become alienated both from the collective movement and society the actor turns to the blind violence when he finds himself cut off from the very ideology which legitimates his actions. Pure terrorism, Wieviorka concludes, is more than simply a break between those who use it and those it targets it is also a relationship between the individual and the collective he represents which has been rendered unrealistic or artificial. Thus terrorist violence should be understood not as the desperate act of a faltering movement but as a substitute for a movement which has fallen away from the ideology in which it was forged. For the revelations it offers on the roots and motivations of terrorism for its innovative methods and for its useful comparative analysis of terrorist groups in recent history *The Making of Terrorism* will be an important resource across many disciplines for anyone interested in terrorism or political violence.

What if your own government deliberately creates terrorists? What if their short-term aims—deposing regimes that no longer serve western interests, justifying invasions of sovereign nations and expanding the security state at home—have long-term consequences for us all? What if most of the horrific bombings, stabbings and vehicle attacks of recent years are connected indirectly and sometimes directly to British, French and American intelligence? These and other hard-hitting questions are posed by T. J. Coles in this disturbing survey of secret political manoeuvres and covert manipulation. Welcome to the world of manufactured terrorism, backed by a wealth of documentation including court records, parliamentary inquiries and little-known but official publications. The author exposes the role of the deep state in brutal acts of terror, exploring Operation Gladio, Northern Irish terror and predominantly Islamic jihad. He argues that intelligence agencies, the military and governments employ six key methods to manufacture terrorism: 1. Blowback—attacking other countries and provoking violent responses; 2. Proxies—creating terrorists including al-Qaeda and using them against enemies; 3. Provocateurs—provoking individuals from minorities into committing terrorist acts; 4. Green-lighting—allowing terrorists to commit attacks in order to justify specific policies; 5. False flags—committing terrorism and blaming it on designated enemies; 6. Simulations—holding drills and exercises as covers for apparent

terrorist acts contrary to claims that terrorism is caused by people who simply hate our way of life and in contrast to the simplistic narrative of conspiracy websites and talk shows coles argues that each case of terrorism needs to be evaluated separately manufacturing terrorism presents a complex picture that distinguishes between cases of blowback proxies false flags simulations etc it offers an indispensable briefing to help readers make sense of our chaotic and dangerous world

global terrorism has become a frightening reality the situation calls for greater engagement with the public as the necessary eyes and ears of the global anti terrorism coalition however to be effective the public must be equipped with the knowledge of how why and where an individual becomes a terrorist this is the primary goal of this set which seeks to answer one central question what do we currently know about the transformation through which an individual becomes a terrorist

this volume examines the social and political and economic factors that have contributed to the rise of terrorism in pakistan employing an historical and critical terrorism studies perspective

much has changed in warfare in recent years with america now dominant on the international scene and terrorism the new enemy in light of these changes the need for moral grounding in military actions is a more pressing concern than ever when it was originally published moral issues in military decision making reflected the concerns posed by nuclear stalemate and the lessons of vietnam in that highly praised work anthony hartle outlined the essential elements of the professional military ethic created for american military forces in this new edition he reexamines the moral foundations for america s military leadership in the post 9 11 era considering world affairs since the first edition the gulf war bosnia afghanistan iraq 9 11 and the emergence of the united states as an unrivaled military power hartle explains how these events have raised ethical issues that differ dramatically from those of the cold war by the war on terrorism homeland defense asymmetric warfare the proliferation of american military interventions and the un s role in peacekeeping operations using meticulously analyzed case studies twice as many as in the first edition he considers such moral dilemmas as torture challenging superior officers use of overwhelming force and responding to fire in the presence of civilian shields in this revision hartle examines further the status of professional military ethics in light of current affairs changes in the articulation of military values and recent research in a new chapter on human rights he relates moral principles directly to values embedded in the constitution and argues that overwhelming american military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect difficulties

of applying conventional laws of war and human rights doctrine in military operations hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of america s citizens and borders his book demonstrates that the american military must continue to observe those principles in order to be effective in its primary mission
