provides the first literary and cultural historical analysis of the most important third  
century greek epic quintus posthomeric

in the earliest extant works of greek literature zeus reigns supreme in the olympian  
hierarchy however scattered and scanty though they may be there are allusions to  
threats of rebellion which challenge zeus supremacy this book examines these passages  
drawn from homer hesiod and the homeric hymns to offer some new interpretations  
while focusing on the theme of cosmic divine strife it becomes clear that hints of lost  
legends underlie these texts tracing their hidden logic helps to improve our  
understanding of early greek poetry

drawing on the homeric epics this multidisciplinary work reveals the cultural  
transformations which need to take place in order to transition from today s modern

extractive agricultural system to a sustainable natural systems agriculture in order to provide an imaginative foundation on which to build such a cultural transformation the author draws on the oldest and most pervasive pair of literary works in the western canon the iliad and the odyssey he uses themes from those foundational literary works to critique the concept of state sovereignty and to explain how innovative federalism structures around the world already show momentum building toward changes in global environmental governance the book proposes a dramatic expansion on those innovations to create eco states responsible for agroecological management drawing from many years of experience in international institutions the author proposes a system of coordination by which an international agroecology focused organization would simultaneously i avoid the shortcomings of the world s current family of powerful global institutions and ii help create and implement a reformed system of local landscape based agriculture wholly consistent with ecological principles acknowledging the difficulty of achieving reforms such as these the author suggests that a new cultural conceptual narrative can be constructed drawing on values set forth 2 700 years ago in the homeric epics he explains how these values can be reimagined to drive forward our efforts in addressing today s the climate and agricultural crises in ways that reflect not reject the natural processes and relationships that make the earth a living planet this book will be of great interest to students academics and policymakers addressing issues of agrarian values environmental and agricultural law environmental restoration agroecology and global institutional reform

late hellenistic greek literature both prose and poetry stands out for its richness and diversity recent work has tended to take an author by author approach that underestimates the interconnectedness of the literary culture of the period the chapters assembled here set out to change that by offering new readings of a wide range of late hellenistic texts and genres including historiography geography rhetoric and philosophy together with many verse texts and inscriptions in the process they offer new insights into the various ways in which late hellenistic literature engaged with its social cultural and political contexts while interrogating and revising some of the standard narratives

of the relationship between late hellenistic and imperial greek literary culture which are too often studied in isolation from each other as a whole the book prompts us to rethink the place of late hellenistic literature within the wider landscape of greek and roman literary history
