this unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day relying on written records from as far back as 2400 bce and using sources ranging from the bible to security council resolutions the author pieces together the history of a subject which is almost as old as civilisation itself the author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict thus it is that this work is divided into three substantial parts volume 1 on the laws affecting combatants and captives volume 2 on civilians and volume 3 on the law of arms control this second book on civilians examines four different topics the first topic deals with the targetting of civilians in times of war this discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have

struggled to keep pace the second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition the third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred the final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition as a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare it also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

the book is a work of non fiction the book is a historical analysis of the evolution of a uniquely american constitutionalism that began with the original english royal charters for the exploration and exploitation of north america when the u s constitution was written in 1787 the accepted conception of a constitution was that of the british constitution upon which the colonists had relied in asserting their rights with respect to the imperium comprised of ancient documents parliamentary enactments administrative regulations judicial pronouncements and established custom of equal significance the laws comprising the constitution did not differ from other statutes and as a consequence there was no law endowed with greater sanctity than other legislative enactments in framing the revolutionary state constitutions following the retreat of the crown governments in the colonies as well as the later federal constitution the revolutionaries fundamentally reconceived a constitution as being the single authoritative source of fundamental law that was superior to all other statutes regulations and judicial decisions that was ratified by the states and that was subject to revision only through a formal amendment process this new constitutional conception has been hailed as the great innovation of the revolutionary period and deservedly so this american constitutionalism had its origins in the now largely overlooked royal charters for the exploration of north america beginning with the charter granted to sir humphrey gilbert by elizabeth i in 1578 the book follows the development of this constitutional tradition from the early charters of the virginia companies and the covenants entered of the new england colonies through the proprietary charters of the middle atlantic colonies on the basis of those foundational documents the colonists fashioned governments that came to be comprised not only of an executive but an elected legislature and a judiciary in those foundational documents and in the acts of the colonial legislatures the settlers sought to harmonize their aspirations for just institutions and individual rights with the exigencies and imperatives of an alien and often hostile environment when the colonies faced the withdrawal of the crown governments in 1775 they drew on their experience which they formalized in written constitutions this uniquely american constitutional tradition of the charters covenants and state constitutions was the foundation of the federal constitution and of the process by which the constitution was written and

ratified a decade later

excerpt from the book of history vol 2 a history of all nations from the earliest times to the present our information concerning the earliest inhabitants of japan is alike scanty and unreliable at different spots in yezo and the kurile islands excavations are found from three to six feet deep with a length or diameter of fifteen to twenty feet these lie in groups numbering as many as one thousand and are attributed by the ainos to a people called koro pok guru meaning people having excavations or cave dwellers or to the ko bito dwarfs who are said to have inhabited the island before the ainos and to have been exterminated by them these holes were probably covered with a roofing of branches on which earth was laid excavations in their neighbourhood have brought to light potsherds and stone arrows a fact which is the more remarkable as the aino seem never to have learnt the art of making pottery which they do not even now possess on the other hand a few centuries ago they made use of stone arrowheads these were later replaced by points of bamboo which are both more easily made and better suited to hold the poison which they employ in hunting nothing is known as to the origin of the koro pok guru or of the ainos apparently both peoples immigrated from the north at an early period the ainos at any rate advanced as far as the northern half of hondo and perhaps even farther south some authorities consider the ainos a mongolian others a polynesian people dr e baelz places them among the caucasian races and believes them to have been related to the mujiks the peasants of great russia the resemblance at any rate in advanced years is certainly remarkable in this case we must consider the ainos as members of a greater continental race which migrated to japan in prehistoric times and was gradually driven further northward by later arrivals ultimately crossing into yezo by the tsugaru strait there are probably twenty thousand of them in yezo the southern part of sakhalin and in the kurile islands where their race has maintained its purity their civilisation is scarcely higher than it was at the time when they first came in contact with the japanese the origin of the japanese is also wrapped in mystery about the publisher forgotten books publishes hundreds of thousands of rare and classic
