in the game culture reader editors jason c thompson and marc a ouellette propose that game studies that peculiar multi inter and trans disciplinary field wherein international researchers from such diverse areas as rhetoric computer science literary studies culture studies psychology media studies and so on come together to study the production distribution and consumption of games has reached an unproductive stasis its scholarship remains either divided as in the narratologists versus ludologists debate or indecisive as in its frequently apolitical stances on play and fandom thompson and ouellette firmly hold that scholarship should be distinguished from the repetitively reductive commonplaces of violence sexism and addiction in other words beyond the headline friendly modern topoi that now dominate the discourse of game studies what issues approaches and insights are being if not erased then displaced this volume gathers together a host of scholars from different countries institutions disciplines departments and ranks in order to present original and evocative scholarship on digital game culture collectively the contributors reject the commonplaces that have come to define digital games as apolitical or as somehow outside of the imbricated processes of cultural production that govern the medium itself as an alternative they offer essays that explore video game theory ludic spaces and temporalities and video game rhetorics importantly the authors emphasize throughout that digital games should be understood on their own terms literally this assertion necessitates the serious reconsideration of terms borrowed from other academic disciplines figuratively the claim embeds the embrace of game play in the continuing investigation of digital games as cultural forms put another way by questioning the received wisdom that would consign digital games to irrelevant spheres of harmless child s play or of invidious mass entertainment the authors productively engage with ludic ambiguities
