neurosonology is non invasive portable and has excellent temporal resolution making it a
valuable and increasingly popular tool for the diagnosis and monitoring of neurological
conditions when compared to other imaging techniques this guide looks beyond the use of
neurovascular ultrasound in stroke to encompass a wide range of other neurological
diseases and emergencies it offers a practical approach to the examination of patients
interpretation of ultrasound studies and the application of neurosonology to the
development of management and treatment strategies each chapter incorporates a thorough
and clear procedural methodology alongside scanning tips for trainees this step by step
approach is further enhanced by example images and focused diagnostic questions
authored and edited by international experts this practical manual of neurosonology is an
invaluable resource for neurologists neurosurgeons intensivists radiologists and

ultrasonographers

this concise and handy manual provides straightforward up to date guidance for cardiologists and other practitioners on the management of cancer patients with cardiac problems whether they be due to the cancer itself or to antineoplastic treatment detailed attention is devoted to the various forms of cardiotoxicity associated with chemotherapy and radiotherapy the drugs commonly responsible for each toxicity are identified and clear advice is offered on monitoring techniques and treatment approaches in addition the issue of cardiotoxicity due to cancer treatment in particular patient groups children the elderly and those with pre existing cardiac disease is addressed separately with guidance on when and how antineoplastic and or cardiological treatments should be modified further sections describe the correct responses to cardiac problems secondary to the cancer itself including thromboembolic disorders and electrolyte imbalances and the diagnosis treatment and follow up of cardiac tumors a closing section considers how to improve cooperation between oncologists cardiologists and general practitioners to ensure that cancer patients cardiovascular needs are met in a multidisciplinary approach
