pandemic re awakenings offers a multi level and multi faceted exploration of a century of remembering forgetting and rediscovering the influenza pandemic of 1918 1919 arguably the greatest catastrophe in human history twenty three researchers present original perspectives by critically investigating the hitherto unexplored vicissitudes of memory in the interrelated spheres of personal communal medical and cultural histories in different national and transnational settings across the globe the volume reveals how even though the great flu was overshadowed by the commemorative culture of the great war recollections of the pandemic persisted over time to re emerge towards the centenary of the spanish flu and burst into public consciousness following the outbreak of the covid 19 pandemic the chapters chart historiographical neglect while acknowledging the often unnoticed dialogues between scientific and historical discourses probe silences and trace vestiges of social and cultural memories that long remained outside of what was considered collective memory

rich in detail this is a study of the interrelationships between film historical discourse and archival practices exploring the history of several important collections from the eye film museum in amsterdam bregt lameris shows how archival films and collections always carry the historical traces of selection policies restoration philosophies and exhibition strategies the result is a compelling argument that film archives can never be viewed simply as innocent or neutral sources of film history
