the seventh edition of this blue and gold series book brings clarity and context to international law for the seagoing professional this book is the only work that addresses the international law of the sea from the perspective of the united states for those who operate on under and over the sea international law can sometimes be as complex as it is important written by the same former seagoing officer and maritime law professional who authored the current edition of farwell s rules of the nautical road this book was designed to bring clarity and context to international law for the seagoing professional following an introduction to public international law and a short history of the law of the sea the book describes the rules that apply in ports and in the adjacent

maritime zones including the territorial sea exclusive economic zone archipelagic waters and the high seas a highlight of the book are the chapters that focus on subjects of greatest interest to the seagoing professional including military and intelligence activities in the maritime domain maritime law enforcement activities and the use of force at sea the appendices include the text of the 1982 un convention on the law of the sea and the u s senate s understandings of key provisions of the convention whether an academy cadet a midshipman a seasoned commanding officer or master mariner readers of this thorough and timely book will be rewarded with a far greater understanding of the international laws that govern ships and mariners at sea new in this edition over a dozen new cases by courts and arbitration panels interpreting unclos including the south china sea dispute between the philippines and china coverage of commercial seafarer protections under maritime labor convention global responses to the mediterranean migrant crisis coverage of the law protecting our vital submarine cables expanded coverage of unmanned and autonomous vessels and aircraft coverage on vessel health safety and quarantine measures applicable in the covid 19 pandemic a new chapter surveying issues the u s senate should consider in any decision regarding ratification of unclos a new appendix setting out the u s navy and coast guard policies on sovereign immunity of government vessels and aircraft

this book is geared to every student in biology pharmacy and medicine who needs to become familiar with receptor mediated signaling the text starts with explaining some basics in membrane biochemistry hormone biology and the concept of receptor based signaling as the main form of communication between cells and of cells with the environment it goes on covering each receptor superfamily in detail including their structure and evolutionary context the last part focusses exclusively on examples where thorough knowledge of receptors is critical pharmaceutical research developmental biology neurobiology and evolutionary biology richly illustrated the book is perfectly suited for all courses covering receptor based signaling regardless whether they are part of the biology medicine or pharmacology program

the brain is an extremely energy consuming part of the body which makes it dangerously vulnerable to metabolic stress it s no wonder then that abnormalities of brain energy metabolism are becoming the usual suspects and a hallmark of many neurodegenerative diseases the socioeconomic burden of these alone begs for urgent measures to be taken for better understanding both fundamental and applied problems of neuroenergetics and neuroprotection for instance brain imaging reveals that the diseased brains of alzheimer s patients cannot efficiently utilize the vital brain fuel glucose the resulting energy deficit causes neuronal hyperactivity seizures and cognitive impairments administration of native energy substrates complementary to glucose is a logical and attractive in its simplicity approach in fighting the energy crisis in the brain the two closely related aspects of brain activity neuronal and metabolic are currently considered to be of utmost importance in both fundamental and applied neuroscience although recently the studies of both brain activity and metabolism in normal conditions under metabolic stress and in neurodegenerative diseases have experienced significant progress their overlapping areas deserve further clarification by joint efforts from experts in such fields as 1 energy demands supplies and efficiency at the cellular level in neurons glial elements micro vessels and in the process of their coordinated interactions 2 specific roles of energy substrates in fine tuning of the demand supply mechanism in the condition of metabolic stress and 3 the macro level of energy homeostasis

and dietary manipulations possible beneficial for neurodegenerative diseases the result of combining into a coherent whole the recent findings in these fields will hopefully bring forward a broader view and better understanding of the knowledge continuum which is under the threat of further fragmentation due to the unavoidable process of specialization in neuroscience current issue covers the three major groups of topics 1 the pros and cons of studies of neuronal activity using brain slice preparations 2 the role of particular energy substrates in metabolic support of neuronal activity 3 the macro level of energy homeostasis and the dietary manipulations that seem promising in prevention and correction of the diseases of brain energy metabolism
