stimulus class formation has been studied independently by two groups of researchers one group
has come out of a learning theory approach while the second has developed out of a behavior
analytic tradition the purpose of the present volume is to further establish the ties between these
two research areas while allowing for differences in approach to the questions asked the book is
loosely organized around four themes the first two sections deal with what constitutes functional
and equivalence classes in animals and humans in the third section the authors attempt to identify
stimulus control variables that contribute to the formation of equivalences classes the last section
deals with the complex issue of the role of verbal behavior in equivalence classes the goal of the
book is to provide the reader with a better understanding of the current state of research and theory
in stimulus class formation it is also hoped that it will stimulate research into how and under what
conditions stimulus classes can form
