the settling of disputes in international trade and in large and technically complex construction projects can hardly be imagined without the institution that is
arbitration another thing we can be sure about is that insolvency will also remain a part of the lifecycle of business entities within the currently existing
economic system whereas insolvency proceedings are heavily regulated with little leeway for the parties the central tenet of arbitration is the autonomy of the
parties hence this book aims to thoroughly investigate the many legal issues arising in arbitral proceedings when insolvency and arbitration clash this

interaction is increasingly frequent today providing much needed practical guidance derived from a broad and deep theoretical discussion the book covers such aspects as the following the effect of insolvency on the arbitration agreement the arbitration procedure including a potential mandatory stay of proceedings the arbitrator's contract and the arbitral award the position of insolvency and arbitration within a legal order the arbitrability of insolvency related issues and claims the possibility of determining claims in insolvency via arbitration the determining of applicable law and conflict of laws rules in particular when insolvency is opened in a different jurisdiction than that of the arbitration and insolvency in arbitration within the application of the european insolvency regulation after a chapter on the relevant background theories the two main chapters of the book focus first on general issues that can arise in a domestic situation and second on problems particular to international cases of insolvency in arbitration the primary domestic perspective is the german one with abundant additional detail to fully embrace the international relevance of the discussion the author concludes with a number of considerations informed by practitioner feedback discussions throughout the work and as many arbitration case law examples as possible for tribunals dealing with insolvency in arbitration based on a systematic application of arbitration and insolvency theory the book provides an all encompassing and holistic discussion from before an arbitration is started to after the award has been enforced in this way the book provides a one stop shop for practitioners both lawyers and arbitrators helping tribunals to navigate the treacherous waters of insolvency in arbitration

this book analyses the contractual mechanisms requiring parties to exhaust a selected amicable dispute resolution procedure before proceedings in court or arbitration are initiated it briefly explains the phenomenon of integrated dispute resolution outlines adr methods commonly used in multi tiered clauses and presents the overview of standard clauses published by various adr providers and professional bodies the core of the analysis is devoted to the enforceability of multi tiered clauses under the legal systems of england and wales germany france and switzerland it is essential reading for practitioners and academics working in this area
