this book is the first collection of multi disciplinary research on the experience of italian jewish musicians and composers in fascist italy
drawing together seven diverse essays from both established and emerging scholars across a range of fields this book examines multiple

aspects of this neglected period of music history including the marginalization and expulsion of jewish musicians and composers from italian theatres and conservatories after the 1938 39 race laws and their subsequent exile and persecution using a variety of critical perspectives and innovative methodological approaches these essays reconstruct and analyze the impact that the italian race laws and fascist italy s musical relations with nazi germany had on the lives and works of italian jewish composers from 1933 to 1945 these original contributions on relatively unresearched aspects of historical musicology offer new insight into the relationship between the fascist regime and

this is a filmography in two volumes of not only all of the english language movies made during the 1960s that had a u s theatrical release but major foreign films exhibited in the united states as well the following information is provided for each film year of release nation of origin if other than the u s production or distribution company black and white or color running time genre production credits cast and characters and a brief synopsis this turbulent decade is unusually interesting in the history of cinema those films released in the early part of the decade were similar to those of the 1950s but as the years passed the offerings changed in many ways

this volume presents the theology arts conversation from a distinctly christian perspective as a witness of the gospel of christ to the world a widespread interest in the historical socio cultural and political embeddedness of theology and the arts permeates it this theme of embeddedness tracks through several overarching and interlocking concerns the relationship between form and content in both art and theology the intensification of the metaphysical and the theological contra materialist and positivist reductionisms the expansion of the epistemological possibilities of the theology art conversation and a robust understanding of the world as the theatre of god s glory several chapters have been co written by theologians and artists as part of demonstrating the kind of conversation that this book commends a thorough going commitment to scripture is also woven into the many different habits of thought represented in this volume part i surveys different approaches to the theology arts conversation part ii focuses on how particular art forms bring theological issues to the surface and how theological and denominational traditions shape the making and receiving of the arts part iii delves into key topics in the current theology arts scene and asks how artistic and theological performance can both speak to theological and artistic knowing and help to celebrate and interrogate embodied lived reality

the metaphor of marriage often describes the relationship between poetry and music in both medieval and modern writing while the troubadours stand out for their tendency to blur the distinction between speaking and singing between poetry and song a certain degree of semantic slippage extends into the realm of italian literature through the use of genre names like canzone sonetto and ballata yet paradoxically scholars have traditionally identified a divorce between music and poetry as the defining feature of early italian lyric senza vestimenta reintegrates poetic and musical traditions in late medieval italy through a fresh evaluation of more than fifty literary sources transmitting trecento song texts these manuscripts have been long noted by musicologists but until now they have been used to bolster rather than to debunk the notion that so called poesia per musica was relegated to the margins of poetic production jennings revises this view by exploring how scribes and readers interacted with song as a fundamentally interdisciplinary art form within a broad range of literary settings her study sheds light on the broader cultural world surrounding the reception of the italian ars nova repertoire by uncovering new diverse readers ranging from wealthy merchants to modest artisans

polish born composer and pianist ignaz friedman summarized his approach to music by stating simply there are the notes there is what is behind the notes in allan evans s biography of the master pianist he shows the reader the behind and the between of friedman s life and work an admirable task since an account of friedman has appeared in only one book to date and weighed in at only a few paragraphs friedman s repertory emphasized the major works of beethoven chopin liszt and brahms but also included new scores by novak karl weigl kodaly and glazunov he is most notably associated with his interpretation of the chopin mazurkas which by all accounts he played with the same rhythmic nuance as their composer evans examines friedman s life as a cultured jewish musician from poland his studies in leipzig and vienna his marriage to many schidlowsky and his performing career teaching and retirement in australia

this book first appeared in 1967 in the years since then it has spawned the new academic sub discipline of musical iconology which belongs equally to the histories of art and of music emmanuel winternitz who was for thirty one years curator of musical collections at the metropolitan museum of art is one of the world s leading authorities on the history of musical instruments he is also an erudite historian of art combining these two interests he has for many years studied the innumerable representations of musical instruments in western art in this collection of closely related articles he examines what these pictures tell of the design and construction of instruments of their

performance practice and of the often subtle symbolic use to which artists put them kithara and cittern lute and lyre bagpipe and hurdy gurdy and the ubiquitous lira da braccio all of these figured largely in the art of the middle ages or the renaissance together with a clutch of shawms zinks and crumhorns and a variety of fantastic instruments that existed only in the imagination of the artists in more than 200 photographs and many drawings winternizt illustrates instruments that range from an egyptian wall painting of a harp to a musette in a watteau f te champ tre he draws from the works of titian raphael d rer and bruegel and also from medieval manuscripts and sculpture winternitz discusses these diverse elements with a combination of formidable learning wit and keen insight that makes this book at once a seminal work for scholars and a delight for lovers of art and music
