andrew jackson and those tennesseans who along with him were a major force in tennessee and american political life can best be understood by examining the political culture they all shared the ten men studied here were the children or grandchildren of immigrants from either the scottish lowlands or the north of ireland all experienced the rise from the yeoman artisan class to that of landed gentry and all displayed in their adult lives the influence of that move from one socioeconomic class to another this view of jackson and his closest friends suggests a view of these men s motives their values attitudes and beliefs were somewhat different than historians have pictured for us these jacksonians sought to preserve the world of their fathers while changing their place in the world they looked back but moved ahead they were self interested but tempered always by a selfless ideal

what makes a leader truly great is it simply a matter of management style and personality or is it character that matters most moral visions takes an insightful look into america s leaders of the past to answer these questions and demonstrates that values and moral convictions are critical to the strength of a nation supposedly we learn about the candidates for the highest office through a series of tests called debates which are instead an exchange of soundbites we can t know whether an aspirant to the presidency has the ability to ask good questions or only a suave or belligerent ability to answer them moral vision is a human interest introduction to american history through studies of nineteen leaders presidents almost presidents a tycoon a crusading journalist and even a leading 19th century abortionist its lessons can help voters sort through the candidates in 2024 and beyond by measuring them against previous leaders none of whom was faultless it shows how the deepest views often grow out of religious belief and influence political goals racial prejudices sexual activities uses of power and senses of service in his 1789 inaugural address george washington pledged that the foundation for national policy will be laid in the sure and immutable principles of private morality marvin olasky shows how 19th century leaders like thomas jefferson andrew jackson and grover cleveland partly upheld and partly ignored that promise and 20th century leaders like woodrow wilson john f kennedy and bill clinton tried to compartmentalize the private and the public an extensively updated version of the american leadership tradition moral vision is for anyone tired of today s textbook tendencies to submerge the role of individuals as big economic and demographic waves roll in history is more than statistics economics and group identities human beings are more than paper boats riding the rainfall into gutters
