an investigative journalist exposes the many holes in today's bestselling behavioral science and argues that the trendy TED talk friendly psychological interventions that are so in vogue at the moment will never be enough to truly address social injustice and inequality with their viral TED talks bestselling books and counter intuitive remedies for complicated problems psychologists and other social scientists have become the reigning thinkers of our time grit and power posing promised to help overcome entrenched inequalities in schools and the workplace the army spent hundreds of millions of dollars on a positive psychology intervention geared at preventing PTSD in its combat soldiers and the implicit association test swept the nation on the strength of the claim that it can reveal unconscious biases and reduce racism in police departments and human resources departments but what if much of the science underlying these blockbuster ideas is dubious or fallacious what if Americans' longstanding preference for simplistic self help platitudes is exerting a pernicious influence on the way behavioral science is communicated and even funded leading respected academics and the media astray in the quick fix Jesse Singal examines the most influential ideas of recent decades and the shaky science that supports them he begins with the California legislator who introduced self esteem into classrooms around the country in the 1980s and the Princeton political scientist who warned of an epidemic of youthful superpredators in the 1990s in both cases a much touted idea had little basis in reality but had a massive impact turning toward the explosive popularity of 21st century social psychology Singal examines the misleading appeal of entertaining lab results and critiques the idea that subtle unconscious cues shape our behavior as he shows today's popular behavioral science emphasizes repairing improving and optimizing individuals rather than truly understanding and confronting the larger structural forces that drive social ills like anand giridharadas's winners take all the quick fix is a fresh and powerful indictment of the thought leaders and influencers who cut corners as they sell the public half baked solutions to problems that deserve more serious treatment

this book discusses the latest advances in digital modeling systems DMSS and additive manufacturing AM technologies it covers applications of networked technologies

ubiquitous computing new materials and hybrid production systems discussing how they are changing the processes of conception modeling and production of products and systems of product the book emphasizes ergonomic and sustainability issues as well as timely topics such as dmss and am in industry 4 0 dmss and am in developing countries dmss and am in extreme environments thus highlighting future trends and promising scenarios for further developing those technologies based on the ahfe 2019 international conference on additive manufacturing modeling systems and 3d prototyping held on july 24 28 2019 in washington d c usa the book is intended as source of inspiration for researchers engineers and stakeholders and to foster interdisciplinary and international collaborations between them
