step richly into the animal world by discovering what their tracks tell you about their purpose mood and individuality learn to understand an animal s current behavior and choices through the context of its biology and the tracks it leaves behind from decades of field research and teaching tracking to thousands expert tracker jim lowery leads you to confident identification of tracks and into a deeper relationship with animals and their habitat using many examples tips and focused notes written specifically for field exploration this guide features extensive illustrations and photos of tracks which show you speed movement and behavior thorough and concise notes for the tracker about the biology of each species distilled from nearly a thousand

primary sources track windows which teach you how to access each species essence through field exploration clear identification tips to help you make distinction between easily confused tracks and compare tracks of similar species

jim lowery is among north america s leading tracking experts in this book he distills his remarkable expertise gained over decades of intensive research and practical field experience into a comprehensive field guide to tracking north american mammals fully illustrated with hundreds of drawings and high resolution photographs the tracker s field guide sets a new standard for tracking books

the naturalist frequently finds that to learn to identify species is a most difficult task and yet nothing is more important to his work he finds that species are not separated merely on shape and colour but on structural peculiarities which frequently are connected with particular habits this is especially the case in vertebrate animals which in great britain with its very limited number of forms may be identified in a haphazard manner by elimination this is impossible in a country where different climatic areas interdigitate and where there are many species as the united states which for the purpose of the naturalist is a continent here prof h s pratt fills the bill by his vertebrate animals of the united states which however omits birds a short account of each group is given the anatomical features dividing it up into sub groups and families being usually illustrated where necessary special features for families are described and then follow keys to the genera descriptions of the same and keys to their species the whole closes with a good bibliography and a glossary of technical terms the short descriptions of each species with mention of their geographical distributions and habitats are excellent and the tabulation of the sub species most useful we learn that there are about 600 species of freshwater fishes 70 of newts and 61 of frogs and toads we are given a key by which their tadpoles and eggs can be identified 300 reptiles and a wide series of mammals belonging to 9 orders we characterise this publication as a book for ready reference such as should be on the shelves of all american naturalists

from gpo bookstore contains an anthology of sixteen oral histories that chronicle the establishment of combined forces command afghanistan includes a lengthy interview with Lt gen david w barno the first commander of the new headquarters in which he discusses the strategic challenges of afghanistan the coordination of political and military efforts by his command and the development and implementation of a counterinsurgency strategy that considered the complexity of the afghan insurgency
