discusses the history of underwater archaeology following the evolution in methods and looking at some of the treasures that have been recovered from beneath the sea

departments of transportation and other construction agencies are required to locate and conserve cultural resources located in the area of a construction project although most organizations have procedures for locating cultural resources on land the relatively new field of underwater archaeology lacks clearly defined guidelines for preconstruction surveys for structures over water the lack of specific guidelines complicates decisions by administrators who are unfamiliar with the issues concerning submerged cultural resources but who are nevertheless required to consider them in planning projects the increase in public interest in underwater archaeology and the recent passage of legislation protecting underwater historical sites indicate that greater attention will need to be directed toward

consideration of these resources in construction projects this report reviews the relevant cultural resource legislation and it summarizes the origins techniques and working conditions of underwater archaeology the differences between underwater and land archaeology are primarily related to the specialized technology required for underwater work and exploration therefore the methodology of underwater archaeology and the application of survey procedures are discussed in detail

anthony firth argues that whilst on land the relationship between archaeology and nationalism is defined and complementary once you go underwater things are very different based on the author s thesis this specialised study looks at how the united kingdom manages archaeology and therefore the past

this volume is an indexed bibliography of underwater archaeology and related topics it covers a range of subjects including shipbuilding and naval architecture underwater archaeology artefacts conservation and archaeological sites
