aircraft of the royal australian air force tells the story of the raaf s first one hundred years by  
describing the acquisition operation and service record of the multitude of aircraft types flown by  
the raaf the 176 aircraft types include the flimsy wood and canvas aircraft typical of world war i  
through the technological advances during and after world war ii to modern fifth generation  
complex aircraft like the f 35 lightning ii even before its formation sir richard williams the father  
of the raaf had decided to employ an alpha numeric numbering system to identify and account for  
each aircraft in service this system started with a1 a2 a3 etc as each type of aircraft came into  
service each individual aircraft within each series was identified as a1 1 a1 2 and so on and the  
aircraft serial became known colloquially as the a number with some exceptions over the century

since the a number system started aircraft entered raaf service in broadly the sequence of the a numbers and so this book is intended to assist in charting the 100 year history of the raaf by listing aircraft operated in a number sequence rather than by listing them by role such as fighter bomber maritime trainer transport etc or alphabetically by name or by manufacturer the inclusion of a comprehensive index and the quick reference guide to aircraft by role is intended to facilitate the location of the entry for any specific type of aircraft for those who may not already know its a number aircraft of the royal australian air force is a must have for all those who have served in the raaf those with a passion for military aviation and aircraft in general and the broader members of the public wishing to gain an appreciation of the royal australian air force in its centenary year

find a job get hired get paid no cfi no problem becoming a competitive candidate for low time flying jobs and successfully navigating the next 1 000 hours of your career requires knowledge and a set of soft and hard skills that commercial pilot training programs omit from their teach to the test curriculum the pilot s guide to low time flying jobs fills these holes and aids low time commercial pilots in all aspects of bridging the tedious gap between their commercial checkride and the 1 500 hour atp milestone this guide will teach you how to overcome the obstacles to employment you face as a low time pilot what jobs are available their minimum experience requirements typical schedule compensation applicable regulations and flight techniques where to search for jobs as well as a list of nearly 70 non cfi low time pilot employers across the us to whom you can apply networking techniques with real examples of successful strategies that you can replicate how to create the most effective pilot specific resume and cover letter with samples of each the most critical information to study when preparing to begin a new job or fly a new aircraft as well as the most effective methods of self studying professional pilot techniques tips and knowledge including flight planning considerations performance and weather so that you can take your airmanship to the next level how to deal with the seldom discussed but most significant challenges faced by professional pilots including external pressure imposed by employers and crew members imposter syndrome and mental health corporate jet pilot and flight instructor michael carlini has condensed 10 years and 2 000 flight hours of experience into a few hundred pages that can be consumed in a matter of hours giving you a detailed actionable and proven guide to getting hired as a low time commercial pilot
