some things are reasons for us to perform certain actions that it will spare you great pain in the future for example is a reason for you to go to the dentist now and that you are already late for work is a reason for you not to read the next article in the morning paper why are such considerations reasons for or against certain actions constructivism offers an intriguing answer to this question its basic idea is often encapsulated in the slogan that reasons are not discovered but made by us andreas m ller elaborates this idea into a fully fledged account of practical reasons makes its theoretical commitments explicit and defends it against some well known objections constructing practical reasons begins with an examination of the distinctive role that reason judgements play in the process of practical reasoning this provides the resources for an anti representationalist conception of the nature of those judgements according to which they are true if they are true not because they accurately represent certain normative facts but because of their role in sound reasoning on the resulting view a consideration owes its status as a reason to the truth of the corresponding reason judgement and thus ultimately to the soundness of a certain episode of reasoning consequently our practical reasons exhibit a kind of mind dependence but this does not force us to deny their objectivity

recollections of the past come to an end just as the terrors of the present are unleashed the survival of humans and dhampires alike depends on strauss but does he dare take action and thus reveal one of his most closely guarded secrets
