this is a new and revised edition of a book which has already established itself as a basic text in social theory the first section of the work provides a concise critical analysis of some leading schools of thought in social philosophy giving

particular attention to phenomenology, ethnomethodology and Wittgensteinian thought. Giddens concentrates primarily upon the implications of these various perspectives for an account of human action and its intelligibility. An action approach on its own, however, will not do in human social life. Action and structure presuppose one another. The author therefore moves on to provide a series of concepts relevant to understanding the production and reproduction of society. The book concludes with a succinct statement of some new rules of sociological method, representing the first and most trenchant exposition of the principles of structuration theory. This edition also contains a substantial new introduction in which Giddens replies to some of the more persistent criticisms made of the original version and also addresses some important issues originally discussed only in a cursory way.

Anthony Giddens is one of the world's most prominent and prolific sociologists, and yet he is also a difficult study for the beginning student of sociology. This is the first introduction to the work of Giddens, including the major part of his sociological and social theoretical project. The author traces Giddens' development from the late sixties to the nineties in a straightforward, readable style, covering all parts of Giddens's sociology in a well-arranged summary. Also featured is a lengthy interview with Giddens by the author and the most comprehensive Giddens bibliography to date.

Anthony Giddens is one of the most famous and influential sociologists of recent decades, largely credited with the concept of the 'third way'. He continues to be a key advisor to Tony Blair and is generally presented as an exponent of liberalism and socialism. This book provides a controversial introduction to Giddens' work, covering the wide range of his writing from theory to self-reflexivity, modernity and politics, placing them all within the illuminating framework of a historical context. Giddens' writing has always embodied a political and ethical position, one that has changed considerably over the years and is best understood through the social context in which it was written. His work in the 1970s attempted to marry liberalism and socialism, but following the collapse of communism in the 1990s, East European revolutions, his world view became liberal rather than socialist, and his later work on reflexivity and the 'third way' embodies this. Loyall explores how this world view accounts for many tensions and failures in Giddens' theory and that overall his work is fundamentally flawed.
