for the last four decades parallel computing platforms have increasingly formed the basis for the development of high performance systems primarily aimed at the solution of intensive computing problems and the application of parallel computing systems has also become a major factor in furthering scientific research but such systems also offer the possibility of solving the problems encountered in the processing of large scale scientific data sets as well as in the analysis of big data in the fields of medicine social media marketing economics etc this book presents papers from the international research workshop on advanced high performance computing systems held in cetraro italy in july 2016 the workshop covered a wide range of topics and new developments related to the solution of intensive and large scale computing problems and the contributions included in this volume cover aspects of the evolution of parallel platforms and highlight some of the problems encountered with the development of ever more powerful computing systems the importance of future large scale data science applications is also discussed the book will be of particular interest to all those involved in the development or application of parallel computing systems

public risk perception is a critical factor in determining how policymakers and other decision makers respond to potential risks if the public perceives a particular activity or technology as being high risk policymakers may be more likely to regulate or ban it even if expert assessments suggest that the risks are relatively low this can have important economic and social implications as it may limit innovation and restrict people s choices public risk perception can influence the adoption of new

technologies and public health interventions for example if people perceive a new vaccine or medical treatment as being risky or unsafe they may be less likely to use it even if scientific evidence suggests that it is effective and safe this can undermine efforts to improve public health and prevent the spread of diseases in order to address these issues it is essential to understand how the public perceives different types of risks by identifying the factors that shape public risk perceptions and devising methods to evaluate public risk perception policymakers and other stakeholders can develop more effective risk communication strategies and risk management plans this may involve engaging with the public to address their concerns providing clear and transparent information about risks and benefits and building trust and confidence in new technologies and interventions ultimately by taking into account the perspectives and concerns of the public decision makers can make more informed and responsible choices about managing risks and promoting public welfare

a chilling account of the tradeoff we are willing to make between interactive media technologies and the power of others to watch over and control us this brave new world of electronic marketing and consumption actually lulls consumers into blissful ignorance of how that usage can be and is being monitored
