this report the first of its kind on an oecd country assesses the abilities motivations and

opportunities in Chile's public service for contributing to innovation and provides recommendations on how to further develop them

markets that function well within a stable regulatory and policy environment are key to improving the productivity and sustainability of the food and agriculture sector. This report contains the main findings and policy lessons gained from a series of wide-ranging country reviews on how government policies can improve sectoral productivity and sustainability through their impact on innovation, structural change, natural resource use, and climate change. Improving the policy environment would require rolling back those policies that distort markets the most and retain farmers in uncompetitive and low-income activities that harm the environment, stifle innovation, slow structural and generational change, and weaken resilience.

The Dutch food, agriculture, and horticulture sector is innovative and export-oriented, with high value added along the food chain and significant world export shares for many products.

This book shows how innovation can take place in rural areas and how the modern rural economy differs from the traditional rural economy and metropolitan areas. In addition, it offers four perspectives on modernisation and innovation in rural areas by experts.

This paper reviews existing innovation metrics at the company level and country level and proposes a system of signposts of innovation to help executives with a guiding framework and data resources for evaluating and planning innovation strategies and activities. The scope of the review is intentionally very broad, ranging from academic papers, policy papers, reports by consulting firms, reports by innovative firms, and magazine articles to capture a holistic view of the complexity of innovation activities that today's businesses undertake. We also incorporate input from the conference board members' perspectives, identifying some of the most important metrics they currently use or need in the future, and identifying signposts around which these metrics are organized. The proposed framework is comprised of six major signposts of innovation: technology, digitization, environmental/social sustainability, customer experience, and branding. Internal innovation networks, external innovation ecosystems, captures major areas of innovation activities throughout the life cycle of innovation and reflects the complexity of new generations of innovation models.

Markus Sattler reviews the predictors of successful innovation management on firm level with a meta-analytic approach. His findings suggest that the role of knowledge management and an environment of learning are important success factors on which managers can have a substantial effect.

Many transition economies in Europe and Central Asia are endowed with rich natural resources and biodiversity. At the same time, global climate change and associated extreme weather events are already affecting these countries with serious economic and social consequences. The countries are now seeking new ways to accelerate the use of

green technologies as a measure to adapt to the effects of the changing climate this requires tailor made innovation policy that integrates the environmental concerns of the country this publication is a guide for policymakers to facilitate adoption and application of green technologies it reflects the findings with special reference to green technologies carried out for azerbaijan kazakhstan kyrgyzstan tajikistan and turkmenistan in 2012 and 2013

the oecd territorial review of skåne assesses the capacity of the third largest region in sweden to compete for investment and talents in an increasingly globalised economy skåne has long been one of the three major engines of national growth and it ranks among the top class research and technology hubs in the oecd but it needs to gain back the momentum it lost during the crisis the region s strong knowledge assets and demographic dynamism have not translated into corresponding gains in terms of productivity and skills the review shows the way forward towards a smart healthy and inclusive region and calls for targeted policies to boost demand driven innovation make the most of its diversified pool of human capital and maintain a high quality environment to work and live in

this volume focuses on substantive issues in innovation marketing strategy and the nexus of innovation and marketing strategy

comprises 25 papers on the evaluation of innovation and technology policies in oecd countries focusing on evaluation methods and practices includes case studies of evaluation experiences in selected countries

80 papers selected from picmet 99 as representative of the field
