this book examines resource recovery and recycling from waste metal dust including currently used techniques for waste processing and recycling and their applications with practical examples and economic potentials of the processes the focus of this book is on resource recovery by suitable treatments and techniques including those of recovery by products for the first time this book provides a comprehensive one stop reference including seminal principles and methods the advantages and disadvantages of the processes discussed and the economics of the technology it will serve as a technical reference for working scientists and engineers while serving as an educational reference to students studying the waste recovery of metals

this second edition of mechanical design and manufacturing of electric motors provides in depth knowledge of design methods and developments of electric motors in the context of rapid increases in energy consumption and emphasis on environmental protection alongside new technology in 3d printing robots nanotechnology and digital techniques and the challenges these pose

to the motor industry from motor classification and design of motor components to model setup and material and bearing selections this comprehensive text covers the fundamentals of practical design and design related issues modeling and simulation engineering analysis manufacturing processes testing procedures and performance characteristics of electric motors today this second edition adds three brand new chapters on motor breaks motor sensors and power transmission and gearing systems using a practical approach with a focus on innovative design and applications the book contains a thorough discussion of major components and subsystems such as rotors shafts stators and frames alongside various cooling techniques including natural and forced air direct and indirect liquid phase change and other newly emerged innovative cooling methods it also analyzes the calculation of motor power losses motor vibration and acoustic noise issues and presents engineering analysis methods and case study results while suitable for motor engineers designers manufacturers and end users the book will also be of interest to maintenance personnel undergraduate and graduate students and academic researchers

this volume comprises the select proceedings of the 3rd biennial international conference on future learning aspects of mechanical engineering flame 2022 it aims to provide a comprehensive and broad spectrum picture of the state of the art research and development in thermal fluids energy and process engineering mechatronics control and robotics material science and engineering solid mechanics and structural engineering dynamics and control engineering design manufacturing and industrial engineering automobile engineering this volume will prove a valuable resource for researchers and professionals in mechanical engineering and allied fields

brake pads materials manufacturing processes and testing offers a comprehensive resource on this vital component of the braking system of a variety of vehicles passenger cars light commercial vehicles buses trucks and airplanes this specialized

volume aims to bridge the theory and practice of designing and producing well performing greener and cost effective brake pads it encompasses in part i an overview of friction materials already available on the market and other more recently developed formulations and in part ii step by step examinations of a range of manufacturing parameters with related effects on the specific properties of the selected compounds as well as testing techniques discussions on regulatory standards literature reviews case studies application scenarios and analytical modeling make for a unique contribution that is not only timely but also shows the field s potential for ever growing transformation covers different materials that can be used for brake pads features real life case studies facilitating understanding of current challenges includes sustainability considerations which have acquired importance for academic researchers and manufacturing specialists alike
