ethical dilemmas special populations diversity no other text better assists physicians and other clinicians in providing patients near the end of life with support guidance and hope in the face of hopelessness than end of life care a practical guide

this is a comprehensive guide to providing excellent end of life care it covers the pathway of care at the end of life from initial conversations about end of life care and assessment and planning to care in different settings multi agency care and providing a good death case studies and reflective questions feature throughout

students and newly qualified staff make up much of the workforce delivering end of life care but because end of life care can be both technically challenging and emotionally demanding it is an aspect of nursing that can cause considerable anxiety this very accessible straightforward book helps to allay those concerns and enables pre registration students to prepare confidently for the challenges they will face when they are caring for dying patients and supporting their families each chapter is based on a different and realistic scenario reflecting a range of circumstances to demonstrate the essential generic knowledge and skills they need to develop and draws out the important practical and theoretical issues students should consider and address if patients and their families are to receive the best possible care written by two experienced palliative care lecturer practitioners and mapping closely to the nmc s 2010 domains the book is tailored to the needs of student nurses working with adult patients it explores the importance of their role in end of life care and how this interfaces with the roles of other multidisciplinary professionals involved in the care of their patients it will also be helpful to students of other health care professions and support newly qualified health care professionals working in adult health

mapped to the 2018 nmc standards and written with the support of a student advisory board this is the ultimate resource for developing students confidence and competence in end of life care

focusing on population health and discussing studies using different methodologies a public health perspective on end of life care presents a synthesis and overview of relevant research and empirical data on the end of life that can bear a basis for a more systematic public health of the end of life

america s health care system was built on the principle that life should be prolonged whenever possible regardless of the costs this commitment has often meant that patients spend their last days suffering from heroic interventions that extend their life by only weeks or months increasingly this approach to end of life care is coming under scrutiny from a moral as well as a financial perspective sociologist roi livne documents the rise and effectiveness of hospice and palliative care and growing acceptance of the idea that a life consumed by suffering may not be worth living values at the end of life combines an in depth historical analysis with an extensive study conducted in three hospitals where livne observed terminally ill patients their families and caregivers negotiating treatment livne describes the ambivalent conflicted moments when people articulate and act on their moral intuitions about dying interviews with medical staff allowed him to isolate the strategies clinicians use to help families understand their options as livne discovered clinicians are advancing the idea that invasive expensive hospital procedures often compound a patient s suffering affluent educated families were more readily persuaded by this moral calculus than

those of less means once defiant of death or even in denial many american families and professionals in the health care system are beginning to embrace the notion that less treatment in the end may be better treatment

clinical psychologist e alessandra strada presents the helping professional s guide to end of life care a complete manual designed to help chaplains nurses physicians hospice workers psychotherapists palliative care specialists and psychologists address the psychological needs of terminally ill and dying patients and their families

life care planning and case management handbook second edition brings together the many concepts beliefs and procedures regarding life care plans into one state of the art publication this second edition of a bestseller is focused on prioritizing and managing the spectrum of services for people with serious medical problems and their families

this book addresses the problems faced by people and hospitals dedicated to providing optimal end of life care and asks whether ethicists can function as experts on this subject though ethics consultation is a growing practice in medical contexts difficult questions surrounding the role of ethicists in professional decision making remain the chapters in this book examine the nature and plausibility of moral expertise the relationship between character and expertise the nature and limits of moral authority the question of how one might become a moral expert and the trustworthiness of moral testimony this volume not only engages with the growing literature in the debate on end of life care but also offers new perspectives from both academics and practitioners such perspectives include ways on how to get together to optimize end of life care this book is of particular interest to bioethicists clinicians ethics committees students of social epistemology patient groups and institutions especially religious who may not be sufficiently imparting the social teachings of end of life care it also shows how they are indeed stakeholders for what is today called a good death these new essays advance discussions and provide practical information on dying as well as acting as a guide to those interested in actively effecting change

this report explores the current state of end of life care policy and practice in the uk it focuses in particular on the experiences of older people and incorporates their views and those of carers the issues raised in the report will feed into current debates such as those around palliative health end of life care and right to die legislation

case studies in palliative and end of life care uses a case based approach to provide students and practitioners with an important learning tool to improve critical thinking skills and encourage discussion toward improving experiences for patients and their families the book is organized into three sections covering subjects related to communication symptom management and family care each case is presented in a consistent logical format for ease of use highlighting key evidence based concepts including the case history care setting diagnosis and prognosis assessment treatment considerations and family support a key reference case studies in palliative and end of life care is an invaluable resource for clinicians who provide palliative care to patients with life limiting illnesses and those at the end of life along with their families

nurses often develop long term relationships with the patients and families for whom they care providing quality care until the end of life is absolutely fundamental to nursing this

important book provides the guidelines and tools necessary to provide this care publisher description
