how do economic conditions such as poverty unemployment inflation and economic growth impact youth violence economics and youth violence provides a much needed new perspective on this crucial issue pinpointing the economic factors that are most important the editors and contributors in this volume explore how different kinds of economic issues impact children adolescents and their families schools and communities offering new and important insights regarding the relationship between macroeconomic conditions and youth violence across a variety of times and places chapters cover such issues as the effect of inflation on youth violence new quantitative analysis of the connection between race economic opportunity and violence and the cyclical nature of criminal backgrounds and economic disadvantage among families highlighting the complexities in the relationship between economic conditions juvenile offenses and the community and situational contexts in which their connections are forged economics and youth violence prompts important questions that will guide future research on the causes and prevention of youth violence contributors sarah beth barnett eric p baumer philippe bourgois shawn bushway philip j cook robert d crutchfield linda l dahlberg mark edberg jeffrey fagan xiangming fang curtis s florence ekaterina gorislavsky nancy g guerra karen heimer janet l lauritsen jennifer l matjasko james a mercy matthew phillips richard rosenfeld tim wadsworth valerie west kevin t wolff

this book retraces the history of macroeconomics from keynes s general theory to the present central to it is the

contrast between a keynesian era and a lucasian or dynamic stochastic general equilibrium dsge era each ruled by distinct methodological standards in the keynesian era the book studies the following theories keynesian macroeconomics monetarism disequilibrium macro patinkin leijongufvud and clower non walrasian equilibrium models and first generation new keynesian models three stages are identified in the dsge era new classical macro lucas rbc modelling and second generation new keynesian modeling the book also examines a few selected works aimed at presenting alternatives to lucasian macro while not eschewing analytical content michel de vroey focuses on substantive assessments and the models studied are presented in a pedagogical and vivid yet critical way

the basic tools for analyzing macroeconomic fluctuations and policies applied to concrete issues and presented within an integrated new keynesian framework this textbook presents the basic tools for analyzing macroeconomic fluctuations and policies and applies them to contemporary issues it employs a unified new keynesian framework for understanding business cycles major crises and macroeconomic policies introducing students to the approach most often used in academic macroeconomic analysis and by central banks and international institutions the book addresses such topics as how recessions and crises spread what instruments central banks and governments have to stimulate activity when private demand is weak and what unconventional macroeconomic policies might work when conventional monetary policy loses its effectiveness as has happened in many countries in the aftermath of the great recession the text introduces the foundations of modern business cycle theory through the notions of aggregate demand and aggregate supply and then applies the theory to the study of regular business cycle fluctuations in output inflation and employment it considers conventional monetary and fiscal policies aimed at stabilizing the business cycle and examines unconventional macroeconomic policies including forward guidance and quantitative easing in situations of liquidity trap deep crises in which conventional policies are either ineffective

or have very different effects than in normal time this book is the first to use the new keynesian framework at the advanced undergraduate level connecting undergraduate learning not only with the more advanced tools taught at the graduate level but also with the large body of policy oriented research in academic journals end of chapter problems help students master the materials presented

the first nation wide analysis of the politics of performance funding in higher education performance funding ties state support of colleges and universities directly to institutional performance on specific outcomes including retention number of credits accrued graduation and job placement the theory is that introducing market like forces will prod institutions to become more efficient and effective in the politics of performance funding for higher education kevin j dougherty and rebecca s natow explore the sometimes puzzling evolution of this mode of funding higher education drawing on an eight state study of performance funding in florida illinois indiana missouri ohio south carolina tennessee and washington dougherty and natow shed light on the social and political factors affecting the origins evolution and demise of these programs their findings uncover patterns of frequent adoption discontinuation and re adoption of the thirty six states that have ever adopted performance funding two thirds discontinued it although many of those later re adopted it even when performance funding programs persist over time they can undergo considerable changes in both the amount of state funding and in the indicators used to allocate funding yet performance funding continues to attract interest from federal and state officials state policy associations and major foundations as a way of improving educational outcomes the authors explore the various forces actors and motives behind the adoption discontinuation and transformation of performance funding programs they compare u s programs to international models and they gauge the likely future of performance funding given the volatility of the political forces driving it aimed at educators sociologists political scientists and

policy makers this book will be hailed as the definitive assessment of the origins and evolution of performance funding
