aristotle s categories had an unparalleled influence on the history of metaphysical speculation despite its influence however two fundamental questions remain to this day unanswered 1 how did aristotle generate his list of categories and 2 what is the relationship between aristotle s categories and his other great metaphysical system hylomorphism in this book paul studtmann develops and defends an interpretation that offers a unified and striking answer to both questions aristotle s system of categories is systematically derivable from hylomorphism which in turn is derivable from general theses about the nature of being

the measurement of nervous habits in normal children was first published in 1929 certain nervous habits such as thumb sucking nail biting and others are among the common problems of child behavior a study of their occurrence in some seven hundred normal children on the basis of an inventory is here reported intensive study is given to the relation of such habits to family history habit formation nutritional status fatigue imitation age and sex the material should prove of interest to parents physicians psychologists and teachers one of the significant contributions is the development of a method of measurement which is applicable to any observable trait and which may in the future throw light upon many problems now difficult of solution

the initial government debt to gdp ratio and the government s commitment play a pivotal role in determining the welfare optimal speed of fiscal consolidation in the management of a debt crisis under commitment for low or moderate initial government debt to gpd ratios the optimal consolidation is very slow a faster pace is optimal when the economy starts from a high level of public debt implying high sovereign risk premia unless these are suppressed via a bailout by official creditors under discretion the cost of not being able to commit is reflected into a quick consolidation of government debt simple monetary fiscal rules with passive fiscal policy designed for an environment with normal shocks perform reasonably well in mimicking the ramsey optimal response to one off government debt shocks when the government can issue also long term bonds under commitment the optimal debt consolidation pace is slower than in the case of short term bonds only and entails an increase in the ratio between long and short term bonds

this work brings together philip van der eijk s previously published essays on the close connections that existed between medicine and philosophy throughout antiquity medical authors such as the hippocratic writers diocles galen soranus and caelius aurelianus elaborated on philosophical methods such as causal explanation definition and division and applied key concepts such as the notion of nature to their understanding of the human body similarly philosophers such as plato and aristotle were highly valued for their contributions to medicine this interaction was particularly striking in the study of the human soul in its relation to the body as illustrated by approaches to specific topics such as intellect sleep and dreams and diet and drugs with a detailed introduction surveying the subject as a whole and an essay on aristotle s treatment of sleep this wide ranging and accessible collection is essential reading for the student of ancient philosophy and science
